White,2012-12-06 It gives us pleasure in writing the Preface to this volume in which we tried to bring together a number of stimulating and interesting people discussing physical electrochemistry The first chapter by Ashok Vijh gives a remarkable account of electrochemistry as looked at from a physicist s point of view Among the revelations of the chapter is that in a recent survey of leading areas in Science two out of fifteen areas chosen were electrochemical and these two were the only chemical subjects chosen In Mikhail Vorotyntsev s chapter one finds a very modern study of the double layer but tenuously connected with the simpler studies made in the safe harbor of mercury In the pioneering chapter by Pons et al one is looking at a cutting edge of electrochemistry at this time the use of IR spectroscopy in modes which allow the first practical determinations of the spectra of adsorbed species at the interface an area pioneered by Pons himself In Chapter 4 we have reached photoelectrochemistry once more but now Tributsch speaks about what has rapidly become the major area of that topic photoelectrocatalysis Close to this chapter and indeed intellectually connected with it is that by Schmickler and Schultze about electron transfer reactions at oxide covered metal electrodes in which theories which are still relatively dubious for metal solution surfaces are applied to complex systems involving oxides Annual Report New York State College of Home Economics,1966 *Technical Book Review Index* ,1967 Journal of the British Nuclear Energy Society British Nuclear Energy Society,1973 **Annual Report of the New York State College of Home Economics at Cornell University** New York State College of Home Economics,1956 **Broadcasting Yearbook** ,1951 **Journal of Scientific**
