## 501, V-8 4-stroke carburettor engine with DP or SP drive.

501 is a power package which, together with the DP or SP drive and Power Trim, gives exceptional performance: Speed, acceleration and fuel economy.

The engine is specially adapted for marine use. The engine block and cylinder head are manufactured in special-alloy cast iron, which means less risk of corrosion. Piston rings and valves are made of materials which have been specially developed for marine uses. The raw water pump is driven directly off the crankshaft for optimum durability, long service life and easy accessibility.

The exhaust manifold is entirely water-jacketed for a lower temperature in the engine compartment.

Power Trim enables the drive to be adjusted to the best operating angle for better acceleration, increased top speed or lower fuel consumption at cruising speeds.

The transom shield kit is designed for simple, reliable and time-saving installation work.

The DP drive is designed and built for maximum riding comfort within the speed range of 20 to 47 knots; i.e. low steering forces, low noise level, low planing threshold, good acceleration and low fuel consumption.

Volvo Penta has a well-established service network in more than 100 countries. Authorized workshops, stocking Genuine Parts and staffed by qualified personnel, make sure you get the best service.

501/DP equipped with silencer "POWER PLUS" and power steering. (Extra equipment).
