

Does a Higher World Bank “Doing Business” Ranking Lead to Greater Human Development Outcomes?

The top ten countries, from left to right, ranked according to the table “Top 50 Economies Narrowing the Distance to Frontier the Most Since 2005” on p. 16 of the World Bank *Doing Business* Report.

In *Doing Business 2014* the World Bank pushes for greater “liberalization” and more “free-market instruments” by suggesting that there is a direct correlation between a greater amount of foreign direct investment, generated by a “friendly investment climate for businesses”, and a greater degree of human development. According to the World Bank logic and their list of “Top 50 Economies Narrowing the Distance to Frontier the Most Since 2005”, the top 10 countries of the list — **Rwanda, Georgia, Belarus, Ukraine, Macedonia FYR, Burkina Faso, Kyrgyz Republic, Tajikistan, Burundi, and Egypt** (shown in orange on map below)—should have greater human development in areas of educational, health and gender equality outcomes, along with greater economic and social inclusion. Our report took these ten countries, ranked by the World Bank according to their top 50 economies, and compared their UN Human Development Index scores with their World Bank “Doing Business” overall ranking. **In doing so, we found a much different reality.**

Court-Supervised Restructuring of Large Distressed Companies in Asia Wai Yee Wan,2022-07-28 This book provides an in depth analysis of 4 economically significant Asian jurisdictions Mainland China India Hong Kong and Singapore These jurisdictions have recently either reformed or are

considering reforming their corporate restructuring laws to promote regimes conducive to restructuring financially distressed but otherwise economically viable companies Mainland China India Hong Kong and Singapore continue to adhere to a framework that requires the court's final approval but draw references from Chapter 11 of the Bankruptcy Code 1978 in the United States and or the schemes of arrangement in the United Kingdom However the institutional and market structures are very different in Asia in particular Asia has a far higher concentration in shareholdings among listed firms including holdings by families and the state and a different composition of creditors The book explains how notwithstanding the legal transplantation corporate restructuring laws in these Asian jurisdictions have adapted and evolved due to the frictions in shareholder creditor and creditor creditor relationships and the role of the state in resolving non performing loans and financial distress of state owned enterprises which are listed or which issue public debt The study argues that any reforms must go beyond professionalising the insolvency professionals and the judiciary but must be designed to address fundamental issues of corporate governance bank regulation and enforcing non bankruptcy rules It offers invaluable insights for academics and policy makers alike
