Ecocriticism, Ecology, and the Cultures of Antiquity Christopher Schliephake, 2016-12-07 Although current environmental debates lay the focus on the Industrial Revolution as a sociopolitical development that has led to the current environmental crisis many ecocritical projects have avoided historicizing their concepts or have been characterized by approaches that were either pre historic or post historic while the environmental movement has harbored the dream of restoring nature to a state untouched by human hands there is also the pessimistic vision of a post apocalyptic world exhausted by humanity's consumption of natural resources Against this background the decline of nature has become a narrative template quite common among the public environmental discourse and environmental scientists alike The volume revisits Antiquity as an epoch which witnessed similar environmental problems and came up with its own interpretations and solutions in dealing with them This decidedly historical perspective is not only supposed to fill in a blank in ecocritical discourse but also to question problematize and inform our contemporary debates with a completely different take on nature and humanity's place in the world Thereby a productive dialogue between contemporary ecocritical theories and the classical tradition is established that highlights similarities as well as differences This volume is the first book to bring ecocriticism and the classical tradition into a comprehensive dialogue It assembles

recognized experts in the field and advanced scholars as well as young and aspiring ecocritics In order to ensure a dialogic exchange between the contributions the volume includes four response essays by established ecocritics which embed the sections within a larger theoretical and practical ecocritical framework and discuss the potential of including the pre modern world into our environmental debates

Exploring African approaches to international law: Essays in honour of Kéba Mbaye Frans Viljoen, Humphrey Sipalla, Foluso Adegalu, 2022-10-04 It is unfortunate that the idea that Africa contributes to international law and has always done so remains in 2022 largely a side note an auxiliary approach rather than something widely accepted and deeply entrenched It is cause for pause that this is also true in Africa itself Exploring African approaches to international law Essays in honour of K ba Mbaye is a volume of essays that aims to contribute to a larger effort of imagining what possible approaches to international law Africa has adopted in the decades since the 1960s It also recognises the legacy of the great Senegalese jurist K ba Mbaye Edited by Frans Viljoen Humphrey Sipalla and Foluso Adegalu the volume is divided into five broad thematic parts and comprises eleven chapters It covers the following themes K ba Mbaye in African approaches to international law international legal theory international human rights law international environmental and criminal law and teaching of international law This publication finds its origins in the 2017 Roundtable on African approaches to international law held at the Centre for Human Rights University of Pretoria The explorations at the Roundtable on the concept of an African approach to international law were taken further at the K ba Mbaye Conference on African approaches to international law held at the Senate Hall University of Pretoria in December 2018 This conference brought together around 80 students academics and members of civil society to address the many questions left unanswered by the death of Judge Mbaye arguably Africa's greatest international law jurist of his generation It provided a forum to continue discussions on African approaches to international human rights law building on but rethinking and vernacularising the Third World Approaches to International Law TWAIL approach The contributions to this publication flow from papers presented at the conference However the reflections in the book extend beyond K ba Mbaye as central figure The result is a broad treatment of various aspects of African approaches to international law by thirteen authors and co authors covering a wide range of generational geographic and thematic backgrounds and perspectives
