Smulewicz-Zucker, 2012-03-22 Strangers to Nature challenges a reading public that has grown complacent with the standard framework of the animal ethics debate Human influence on and the control of the natural world has greater consequences than ever making the human impact on the lives of animals more evident We cannot properly interrogate our conduct in the world without a deeper understanding of how our actions affect animals It is crucial that the human-animal relationship become more central to ethical inquiry This volume brings together many of the leading scholars who work to redefine and expand the discourse on animal ethics The contributors examine the radical developments that change how we think about the status of non-human animals in our society and our moral obligations Strangers to Nature will engage both scholars and lay people by revealing the breadth of theorizing about current human-non-human animal relationships *The Age of Sutton Hoo* M. O. H. Carver, 1992 The Age of Sutton Hoo runs from the fifth to the eighth century AD the age which separates the fall of the Roman Empire from the emergence of the nation-states that have endured down to the present day This is a dark and difficult age where hard evidence is rare but glittering and richly varied myths king-lists place-names sagas settlements runic inscriptions palaces belt buckles post-holes middens and graves says the editor are all grist to our mill This volume celebrates the fiftieth anniversary of the discovery of that most famous burial of the early middle ages the great treasure now in the British Museum unearthed from the centre of a ninety-foot long ship buried in the sand beneath a mound on remote Suffolk heathland at Sutton Hoo It also marks the end of the major campaign of excavations carried out there over the past decade which involved the widest possible range of disciplines The scholars whose work is gathered here represent together with Martin Carver's concluding chapter summarising the results of the latest excavations the current state of knowledge about this extraordinary site that it still has secrets to reveal is shown by the last-minute discovery of a striking
