Principles of Management S. Soundaian, 2019-06-04 Management today has become a strategic function in view of frequently occurring economic cycle changes on a global scale resulting in loss of millions of customers and jobs The recessionary trend also has become a prolonged one which has necessitated the application of more mind to this problems Although some argue that recession is an opportunity and it should be properly exploited we cannot agree with this argument and lead our ears to those people The ISM method Version 3 Jan van Bon, Wim Hoving, 2017-06-30 This book describes a revolutionary approach on how to successfully implement IT service management ITSM in an easier faster cheaper and especially more effective way In the book the lessons of 30 years are used to put an end to the chaos and complexity of ineffective ITSM projects Based on simple paradigms a single and compact solution is described for the integrated service management with People Process and Product This is not achieved by setting ITIL or ASL aside but by rearranging the many valuable elements of these frameworks into a simple logical structure and filling the gaps Although the paradigms are explained extensively in the book the solution is very practical and has been proven in recent years in dozens of projects with small and large organizations This publication describes the implementation method with a strong focus on quality assurance and cultural change a comprehensive definition list and an example of a compact process model *Advanced Computer Architectures* Sajjan G. Shiva, 2018-10-24 Despite the tremendous advances in performance enabled by modern architectures there are always new applications and demands arising that require ever increasing capabilities Keeping up with these demands requires a deep seated understanding of contemporary architectures in concert with a fundamental understanding of basic principles that allows one to anticipate what will be possible over the system s lifetime *Advanced Computer Architectures* focuses on the design of high performance supercomputers with balanced coverage of the hardware software structures and application characteristics This book is a timeless distillation of underlying principles punctuated by real world implementations in popular current and past commercially available systems It briefly reviews the basics of uniprocessor architecture before outlining the most popular processing paradigms performance evaluation and cost factor considerations This builds to a discussion of pipeline design and vector processors data parallel architectures and multiprocessor systems Rounding out the book the final chapter explores some important current and emerging trends such as Dataflow Grid biology inspired and optical computing More than 220 figures tables and equations illustrate the concepts presented Based on the author s more than thirty years of teaching and research *Advanced Computer Architectures* endows you with the tools necessary to reach the limits of existing technology and ultimately to break them *Marketing Technology as a Service* Laurie Young, Bev Burgess, 2010-05-24 Despite the fact that vast engineering networks are the foundations of modern society the services that technology companies provide over them have been a relatively neglected area of study As a result marketing in some technology businesses has been depressingly tactical and inconsistent Marketers

with little experience and even less professional training run around presenting PowerPoint decks to each other chasing after the latest fad and throwing erratic changing activities at the market each quarter Many work on the unchallenged assumption that markets are fast changing and that customers only want the lowest prices Yet this industry has liberated human imagination in the internet and convinced the world that they must have a PC and a mobile phone Now as a result of profound relentless global forces some of the leading firms and greatest minds in it are at last turning their attention to service With the advent of cloud computing and radical changes in the engineering of some utilities the marketing of services that are based on a technical infrastructure is about to become as important and sophisticated as in say consumer products This book explores their story and experience I really enjoyed the book From Products to Services by Mr Laurie Young Encouraged by it Haier accelerated its changeover from a traditional product driven to a more customer centric company This new book Marketing Technology as a Service is another major contribution to technology companies for the cultivation of service needs worldwide Mr Zhang Ruimin CEO and Chairman Haier Group Beijing Young and Burgess describe a shift in mindset and pragmatic techniques that are quite doable Rae Sedel MD Global Technology Practice Russell Reynolds Associates This book provides practical and insightful advice on how to use services to turn technology into value add solutions for real people Rudy Provoost CEO Philips Lighting Business leaders in India have been remarkably successful at offering technology based services like outsourcing across the world Currently worth 60 billion they intend to reach 300 billion by 2020 To succeed the Indian business community must offer new value propositions and adapt to emerging trends like cloud computing Burgess and Young have put together the first comprehensive and practical guide for business leaders to meet their challenges of exponential growth Dr Mukesh Aghi Chairman and CEO Steria India **Vanity Fair** ,1924
