GEOGRAPHY

How does geography affect how a civilization develops?

The people who study history are also the people who write about history. They piece together the information they find in order to understand people from the past. Their field of study is called **historiography**.

Social scientists also use geography to study history. The book *Guns, Germs, and Steel* looks at how geography helped and hurt civilizations in the past. Jared Diamond, the book's author, explained the three factors that helped Eurasian civilizations succeed: good temperatures and locations for agriculture, resistance to certain deadly germs, and the ability to develop technology.

Where a group of people settle can affect how, when, and in what way they

develop. The island nation of Japan was very isolated from the West before the mid-1800s. By the early 1900s, Japanese people were trading with the West and the country was considered a world power. Great Britain, also an island nation, developed much earlier. Britain was part of the Roman Empire. It later joined other European countries to start colonies around the world. The British had to develop a strong navy in order to protect its own empire around the globe.

1. Why did Japan develop later than Great Britain?

have dominated the policy discussions and governmental mandates about how reading is taught in public schools across the United States for decades. The resulting fixation on phonics and criticism of public schools continues to drive headlines in spite of what is considered settled science about the essentiality of phonics in early reading instruction. Deborah Duncan Owens' journey to develop a new paradigm for literacy instruction through enlightened literacy provides insight into the convergence of the economic and governmental forces that have resulted in the stagnation of literacy research and practice and the reductionist view of reading instruction that threatens literacy development in the United States. Enlightened Literacy offers an alternative framework that holds the promise of moving beyond the reading wars toward a more expansive vision for literacy education. Actualizing enlightened literacy in the classroom environment is examined through four aspects:

1. a panoramic perspective
2. a humanistic ethos
3. a spirit of curiosity
4. a focus on the pragmatic
