Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all Teaching Global History Alan J. Singer, 2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions

leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it Experiencing World History Paul Vauthier Adams,2000-08 The authors Paul V Adams Lily Hwa Erick D Langer Peter N Stearns and Merry Wiesner Hanks present a chronological framework of world history in terms of its impact on society in Asia Africa Europe the Americas and the Pacific *Global History, Globally* Sven Beckert,Dominic Sachsenmaier,2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope *Global History Globally* addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book s chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them *Global History Globally* is a must read book for all students and scholars of global history

Doing Global History Roland Wenzlhuemer,2019-10-31 The field of Global History has experienced an unprecedented boom in the last two decades and carved itself deeply into the practice of historical research Despite this its conceptual foundations have rarely been explored This introduction to what Global History is brings together theory and practice with 6 key concepts delivered through 6 accessible case studies Re evaluating the central concerns and key approaches in the field it offers an up to date discussion of the foundations of Global History its guiding questions and principal methods at work *Doing Global History* offers students valuable insights into the ways general concepts can be used and applied when doing historical research The 6 concepts connections actors structures space time and transit and their accompanying examples will not only help readers to get a solid grasp of what global history means but will stimulate further engagement in the field Wenzlhuemer successfully shows that global history is best considered as a perspective not a theory or paradigm and guides the reader through ways it can be used in practice to draw new and exciting conclusions Tailored for classroom and student use this book will be invaluable to advanced undergraduates and postgraduates of Global History
