World History Textbook Florida:

The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

Hollywood or History? Scott L. Roberts, Charles J. Elfer, 2021-01-01 The challenges of teaching history are acute where we consider the world history classroom Generalized world history courses are a part of many if not most K-12 curricular frameworks in the United States While United States history tends to dominate the scholarship and conversation there are an equally wide number of middle level and secondary students and teachers engaged in the study of world history in our public schools And the challenges are real In the first place if we are to mark content coverage as a curricular obstacle in the history classroom generally then we must underscore that concern in the world history classroom and for obvious reasons The curricular terrain to choose from is immense and forever expanding dealing with the development of numerous civilizations over millennia and across a wide geographic expanse In addition to curricular concerns world historical topics are inherently farther away from most students' lives not just temporally but often geographically and culturally Thus the rationale for the present text Hollywood or History An Inquiry Based Strategy for Using Film to Teach World History The reviews of the first volume Hollywood or History An Inquiry Based Strategy for Using Film to Teach United States History strategy have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioner Classroom utility and teacher practice have remained our primary objectives in developing the Hollywood or History strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history We believe that students' connection to film along with teachers' ability to use film in an effective manner will help alleviate some of the challenges of teaching world history The book provides 30 secondary lesson plans

grades 6 12 that address nine eras in world history **Primary Sources in World History** James Farr, Patrick J. Hearnden, 2023-03-13 This two volume collection of primary documents covers societies that developed writing systems in different geographical regions during that last 5 000 years While comprehensive in scope this reader focuses on a central theme the unequal allocation of wealth and power both within individual societies and between different polities ranging from small city states to large territorial empires The documents reveal that people living at different times and in different places have used similar methods to achieve similar political and economic objectives By reflecting uniformities as well as diversities in ideas and actions these documents undermine assertions of Western intellectual cultural or moral superiority These readings also show that the expanding supply of goods and services resulting from technological innovations has led to increasing social economic and political racial and gender inequality Selected to give students a deeper understanding of how and why inequalities have emerged in societies around the globe each document will be introduced by a brief explanation of its historical context And each document presented in chronological order will be followed by 3 or 4 review questions giving students an opportunity to test their understanding of its main points *A Bible Believer Looks at World History* Frederick Widdowson, 2010-08-08 This is a review of world history from a Bible believer's perspective It is designed for use by homeschoolers but anyone can learn from it Study Guide for World History I United States Armed Forces Institute, 1956 Resources in Education, 2001-04 **World History in Selected California High Schools** Allan Arthur Siemers, 1959 Teaching U.S. History Thematically Rosalie Metro, 2023 Get started with an innovative approach to teaching history that develops literacy and higher order thinking skills connects the past to students lives and meets state and national standards grades 7 12 Now in a second edition this popular book provides an introductory unit to help teachers build a trustful classroom climate over 70 primary sources including a dozen new ones organized into thematic units structured around an essential question from U S history and a final unit focusing on periodization and chronology As students analyze carefully excerpted documents they build an understanding of how diverse historical figures have approached key issues At the same time students learn to participate in civic debates and develop their own views on what it means to be a 21st century American Each unit connects to current events with dynamic classroom activities that make history come alive In addition to the documents this teaching manual provides strategies to assess student learning mini lectures designed to introduce documents activities to help students process display and integrate their learning guidance to help teachers create their own units and more Book Features Addresses the politicization of history head on with updated material that allows students entry points into the debates swirling around their education Makes document based teaching easy with a curated collection of primary sources speeches by presidents and protesters Supreme Court cases political cartoons excerpted into manageable chunks for students Challenges the master narrative of U S history with texts from Frederick Douglass Susan B Anthony Malcolm X Cesar Chavez Jeanne Wakatsuki Houston and Judy Heumann Offers printable

Readman, C. Radding, C. Bryant, 2014-05-20 Covering two hundred years this groundbreaking book brings together essays on borderlands by leading experts in the modern history of the Americas Europe Africa Asia and Australia to offer the first historical study of borderlands with a global reach *War, Nation, Memory* Keith A. Crawford, Stuart J. Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1.7 billion people or three quarters of the world's population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instill in the young a sense of national pride common identity and shared collective memory To understand this process *War Nation Memory* describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all *War Nation Memory* demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present **Marking the "Invisible"** Andrea M. Hawkman, Sarah B. Shear, 2020-04-01 Substantial research has been put forth calling for the field of social studies education to engage in work dealing with the influence of race and racism within education and society Branch 2003 Chandler 2015 Chandler Husband 2010 King Ladson Billings 2003 Ooka Pang Rivera Ladson Billings 2003 Woyshner Bohan 2012 In order to challenge the presence of racism within social studies research must attend to the control that whiteness and white supremacy maintain within the field This edited volume builds from these previous works to take on whiteness and white supremacy directly in social studies education In *Marking the Invisible* editors assemble original contributions from scholars working to expose whiteness and disrupt white supremacy in the field of social studies education We argue for an articulation of whiteness within the field of social studies education in pursuit of directly challenging its influences on teaching learning and research Across 27 chapters authors call out the strategies deployed by white supremacy and acknowledge the depths by which it is used to control manipulate confine and define identities communities citizenships and historical narratives This edited volume promotes the reshaping of social studies education to support the histories experiences and lives of Students

and Teachers of Color challenge settler colonialism and color evasiveness develop racial literacy and promote justice oriented teaching and learning Praise for *Marking the Invisible* As the theorization of race and racism continues to gain traction in social studies education this volume offers a much needed foundational grounding for the field From the foreword to the epilogue *Marking the Invisible* foregrounds conversations of whiteness in notions of supremacy dominance and rage The chapters offer an opportunity for social studies educators to position critical theories of race such as critical race theory intersectionality and settler colonialism at the forefront of critical examinations of whiteness Any social studies educator researcher concerned with the theorization or teaching of race should engage with this text in their work Christopher L Busey University of Florida
