The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an

overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States Teaching World History in the Twenty-first Century: A Resource Book Heidi Roupp,2015-02-12 This practical handbook is designed to help anyone who is preparing to teach a world history course or wants to teach it better It includes contributions by experienced teachers who are reshaping world history education and features new approaches to the subject as well as classroom tested practices that have markedly improved world history teaching **National Identity and Educational Reform** Elizabeth Worden,2014-02-18 National identity in Moldova remains contested despite repeated attempts by governments historians and educators to cultivate a shared sense of national belonging through the development of history textbooks Concern over professional status and distrust of the government s motivations halted these reforms demonstrating that the success of such efforts greatly depends on teachers and citizens social memory and everyday lives This volume looks at educational reform and the struggle over national identity in the history classroom from the perspectives of five different groups elected politicians Ministry of Education officials textbook authors and historians teachers and students Each chapter explores the actors motivations and agendas regarding reform their role in promoting or obstructing the reform process and their opinions about the ensuing controversy Drawing on months of fieldwork and original research author Elizabeth Worden examines the importance of teachers and students in the success or failure of a reform initiative *Teaching American History in a Global Context* Carl J.
