The Indian Journal of Agricultural Sciences ,2018 **Tractor owner-operators in Nigeria: Insights from a small survey in Kaduna and Nasarawa states** Takeshima, Hiroyuki,Edeh, Hyacinth,Lawal, Akeem,Isiaka, Moshud,2014-06-20 This paper presents results of a small survey of tractor owner operators conducted in Kaduna and Nasarawa states in Nigeria Following are the key findings from simple descriptive statistics 1 owner operators who buy tractors from the private market or from private individuals are more efficient than those who receive tractors through government programs providing services to a greater area at lower costs including during the off peak season 2 providing access to a wider range of tractor horsepower may improve efficiency over diverse soil types 3 similar to some Asian countries in the 1980s tractor operations are mostly concentrated in interviewees local home districts though a fraction form groups and serve in distant locations to earn greater revenues *Jackfruit* Sisir Mitra,2023-01-06 Jackfruit *Artocarpus heterophyllus* is a species of tree in the fig mulberry and breadfruit family Moraceae and is widely esteemed in tropical Asia The jackfruit tree is well suited to tropical lowlands and is widely cultivated throughout South and South East Asia It is also grown to a limited extent in Australia USA East Africa as well as in Brazil Mexico and the Caribbean Producing giant fruits which can reach up to 80kg in size jackfruit is the largest tree borne fruit in the world It is highly versatile providing food timber fuel in addition to medicinal and industrial products The ripe fruit is sweet and is more often used for desserts Canned green jackfruit has a mild taste and meat like texture that lends itself to being called a vegetable meat Hence it is growing in popularity due to its use as a vegan meat alternative Containing information on jackfruit production technology postharvest management and processing this is a valuable resource for researchers in horticulture plant science and those interested in sustainable food systems **Soil and Fertilizers** Rattan Lal,2020-05-06 *Soil and Fertilizers Managing the Environmental Footprint* presents strategies to improve soil health by reducing the rate of fertilizer input while maintaining high agronomic yields It is estimated that fertilizer use supported nearly half of global births in 2008 In a context of potential food insecurity exacerbated by population growth and climate change the importance of fertilizers in sustaining the agronomic production is clear However excessive use of chemical fertilizers poses serious risks both to the environment and to human health Highlighting a tenfold increase in global fertilizer consumption between 2002 and 2016 the book explains the effects on the quality of soil water air and biota from overuse of chemical fertilizers Written by an interdisciplinary author team this book presents methods for enhancing the efficiency of fertilizer use and outlines agricultural practices that can reduce the environmental footprint Features Includes a thorough literature review on the agronomic and environmental impact of fertilizer from degradation of ecosystems to the eutrophication of drinking water Devotes specific chapters to enhancing the use efficiency and effectiveness of the fertilizers through improved formulations time and mode of application and the use of precision farming technology Reveals geographic

variation in fertilizer consumption volume by presenting case studies for specific countries and regions including India and Africa Discusses the pros and cons of organic vs chemical fertilizers innovative technologies including nuclear energy and the U N s Sustainable Development Goals Part of the Advances in Soil Sciences series this solutions focused volume will appeal to soil scientists environmental scientists and agricultural engineers Contemporary Suitability of Nanobionics in Agriculture Vishnu D. Rajput,Arti Goel,Ram Prasad,Tatiana Minkina,2025-04-23 Attempts to apply nanotechnology in

agriculture began with the growing realization that conventional farming technologies would neither be able to increase productivity any further nor restore ecosystems damaged by existing technologies back to their pristine state in particular because the long term effects of farming with miracle seeds in conjunction with irrigation fertilizers and pesticides have been questioned both at the scientific and policy levels and must be gradually phased out Nanotechnology in agriculture has gained momentum in the last decade with an abundance of public funding but the pace of development is modest even though many disciplines fall under the umbrella of agriculture One reason this may be is due to the fact that not much information about the safe use of nanomaterials in agriculture system has been accessible in recent years Contemporary Suitability of Nanobionics in Agriculture provides insight into the uses of nanomaterials in agriculture which will be of particular use for agriculture personnel beyond The book includes an overview of nanobionics in agriculture while also focusing on specific subjects such as recent advances future outlook biosafety regulatory aspects etc Nanotechnologic intervention in farming has bright prospects for improving the efficiency of nutrient use through nanoformulations of fertilizers breaking yield barriers through bionanotechnology surveillance and control of pests and diseases understanding mechanisms of host parasite interactions at the molecular level development of new generation pesticides and their carriers preservation and packaging of food and food additives strengthening of natural fibers removal of contaminants from soil and water improving the shelf life of vegetables and flowers clay based nano resources for precision water management reclamation of salt affected soils and stabilization of erosion prone surfaces to name a few **Oxazole, Isoxazole,**

Benzoxazole-Based Drug Discovery Erum Akbar Hussain,Ambreen Ghani,Zubi Sadiq,2024-09-17 Oxazole Isoxazole Benzoxazole Based Drug Discovery offers complete coverage of oxazole and related molecules both from natural and synthetic origin with a focus on the reaction mechanisms and medicinal pharmacokinetic and computational aspects New and contemporary methods of synthesis are discussed with a special focus on green environment friendly procedures Discussion of stereochemical studies particularly on natural molecules are included Computational chemistry has emerged as an integral tool for drug discovery hence this book explains how the drug candidate is established as suitable for clinical trials with the help of molecular docking and virtual screening modeling This book offers a broad range of recent developments and detailed coverage of synthesis and biological activities of the drugs and is an ideal reference guide to researchers working in organic and medicinal chemistry Presents detailed coverage of chemical structures and practical synthetic methods of oxazoles

Hossain,Mobashwer Alam,Saman Seneweera,Sujay Rakshit,Robert J. Henry,2021-06-30 The global population is projected to reach almost 10 billion by 2050 and food and feed production will need to increase by 70% Wheat maize and sorghum are three key cereals which provide nutrition for the majority of the world s population Their production is affected by various abiotic stresses which cause significant yield losses The effects of climate change also increase the frequency and severity of such abiotic stresses Molecular breeding technologies offer real hope for improving crop yields Although significant progress has been made over the last few years there is still a need to bridge the large gap between yields in the most favorable and most stressful conditions **Improving the evidence base on aflatoxin contamination and exposure in Africa** Okoth,

S.,2016-12-31 This report reveals that substantial knowledge is available about the aflatoxin challenge that plagues African farmers other agri entrepreneurs and governments Commissioned by the ACP EU Technical Centre for Agricultural and Rural Cooperation CTA in collaboration with the African Union Commission Partnership for Aflatoxin Control in Africa PACA this literature review reveals that a wide range of commodities that are traded nationally regionally and internationally are contaminated by aflatoxins African citizens and economies are negatively impacted as a result *International Journal of Economic and Political Integration: Vol.1, No.1* ,2011-09-28 *Rhizomicrobiome in Sustainable Agriculture and Environment* Joginder Singh Panwar,Vikas Sharma,2024-10-18
