

Laboratory: Human Population Growth

Mrs. Côté

Answer Key

Enviro. Science 120

Pre Lab Work:

Before beginning this laboratory, answer the following questions on your own piece of paper in your notebook:

- Define the following terms:
 - growth rate – describes how fast a population is increasing or decreasing and is dependent upon the birth rate and death rate
 - birthrate – is the number of infants born in a given year/1000 people in the population
 - death rate – is the number of people who die in a given year/1000 individuals in the population
 - zero population growth – when the population is in equilibrium or the number of births and deaths are equal
 - developed country – countries that highly developed economy and advanced technology
 - developing country – countries that are considered to have low standard of living, and undeveloped industrially
 - demographic transition – refers to the transition from high birth and death rates to low birth and death rates
- What is a population explosion? How quickly is our population growing each year? What about each day?
A population explosion is when a population lacks limited resources so is able to grow out of control. The human population is grows about 80 million a year and 219, 178 each day.
- How is the growth rate of the human population calculated?
 $\text{Growth rate} = \text{birth rate} - \text{death rate}$
- What causes a negative population growth? What causes a positive population growth?
Negative population growth occurs when the birth rate is less than the death rate
Positive population growth occurs when the birth rate exceeds the death rate
- Why do the two graphs appear to have a different shape?
The population growth rate was much slower in the earlier years. The J-curve shows exponential population growth and the graphs are not drawn to the same scale.
- Using a piece of paper, create the following charts:

Country	Birthrate (%)	Death rate (%)	Population Growth 2005	Population Growth 2050	Demographic Transition	Relative Place in Transition	Sketch graph showing Blue & Pink Line
USA	2.06	0.51	0.92	-0.06	1.55	5

Bollyky, 2019-10-01 Why the news about the global decline of infectious diseases is not all good Plagues and parasites have played a central role in world affairs shaping the evolution of the modern state the growth of cities and the disparate fortunes of national economies This book tells that story but it is not about the resurgence of pestilence It is the story of its decline For the first time in recorded history virus bacteria and other infectious diseases are not the leading cause of death or disability in any region of the world People are living longer and fewer mothers are giving birth to many children in the hopes that some might survive And yet the news is not all good Recent reductions in infectious disease have not been accompanied by the same improvements in income job opportunities and governance that occurred with these changes in wealthier countries decades ago There have also been unintended consequences In this book Thomas Bollyky explores the

paradox in our fight against infectious disease the world is getting healthier in ways that should make us worry Bollyky interweaves a grand historical narrative about the rise and fall of plagues in human societies with contemporary case studies of the consequences Bollyky visits Dhaka one of the most densely populated places on the planet to show how low cost health tools helped enable the phenomenon of poor world megacities He visits China and Kenya to illustrate how dramatic declines in plagues have affected national economies Bollyky traces the role of infectious disease in the migrations from Ireland before the potato famine and to Europe from Africa and elsewhere today Historic health achievements are remaking a world that is both worrisome and full of opportunities Whether the peril or promise of that progress prevails Bollyky explains depends on what we do next A Council on Foreign Relations Book *History of Soy Flour, Flakes and Grits (510 CE to 2019)* William Shurtleff; Akiko Aoyagi, 2019-02-17 The world's most comprehensive well documented and well illustrated book on this subject With extensive subject and geographic index 245 photographs and illustrations mostly color Free of charge in digital format on Google Books [Resources in Education](#), 1992 *ERDA Energy Research Abstracts*, 1983
