Doctoral Education and the Faculty of the Future Ronald G. Ehrenberg, Charlotte V. Kuh, 2011-05-02 American colleges and universities simultaneously face large numbers of faculty retirements and expanding enrollments Budget constraints have led colleges and universities to substitute part time and full time non tenure track faculty for tenure track faculty and the demand for faculty members will likely be high in the decade ahead This heightened demand is coming at a time when the share of American college graduates who go on for PhD study is far below its historic high The declining interest of American students in doctoral programs is due to many factors including long completion times low completion rates the high cost of doctoral education and the decline in the share of faculty positions that are tenured or on the tenure track In short doctoral education is in crisis because the impediments are many and the rewards are few students often choose instead to enroll in professional programs that result in more marketable credentials In *Doctoral Education and the Faculty of the Future* scientists social scientists academic administrators and policy makers describe their efforts to increase

and improve the supply of future faculty They cover topics ranging from increasing undergraduate interest in doctoral study to improving the doctoral experience and the participation of underrepresented groups in doctoral education

Educating Scholars Ronald G. Ehrenberg, Harriet Zuckerman, Jeffrey A. Groen, Sharon M. Brucker, 2009-09-28 Meeting the challenges faced by today's U S doctoral humanities programs Despite the worldwide prestige of America's doctoral programs in the humanities all is not well in this area of higher education and hasn't been for some time The content of graduate programs has undergone major changes while high rates of student attrition long times to degree and financial burdens prevail In response the Andrew W Mellon Foundation in 1991 launched the Graduate Education Initiative GEI the largest effort ever undertaken to improve doctoral programs in the humanities and related social sciences The only book to focus exclusively on the current state of doctoral education in the humanities Educating Scholars reports on the GEI's success in reducing attrition and times to degree the positive changes implemented by specific graduate programs and the many challenges still to be addressed Over a ten year period the Foundation devoted almost eighty five million dollars through the GEI to provide support for doctoral programs and student aid in fifty four departments at ten leading universities The authors examine data that tracked the students in these departments and in control departments as well as information gathered from a retrospective survey of students They reveal that completion and attrition rates depend upon financial support the quality of advising clarity of program requirements and each department's expectations regarding the dissertation The authors consider who earns doctoral degrees what affects students' chances of finishing their programs and how successful they are at finding academic jobs Answering some of the most important questions being raised about American doctoral programs today Educating Scholars will interest all those concerned about our nation's intellectual future

Redefining Liberal Arts Education in the Twenty-First Century Robert E. Lockett Jr., 2021-05-28 Contributions by William D Adams Sarah Archino Mario J Azevedo Katrina Byrd Rico D Chapman Helen O Chukwuma Monica Flippin Wynn Tatiana Glushko Eric J Griffin Kathi R Griffin Yumi Park Huntington Thomas M Kersen Robert E Lockett Jr Floyd W Martin Preselfannie W McDaniels Dawn Bishop McLin Lauren Ashlee Messina Byron D Andra Orey Kathy Root Pitts Candis Pizzetta Lawrence Sledge RaShell R Smith Spears Joseph Martin Stevenson Seretha D Williams and Karen C Wilson Stevenson *Redefining Liberal Arts Education in the Twenty First Century* delves into the essential nature of the liberal arts in America today During a time when the STEM fields of science technology engineering and math dominate the narrative around the future of higher education the liberal arts remain vital but frequently dismissed academic pursuits While STEAM has emerged as a popular acronym the arts get added to the discussion in a way that is often rhetorical at best Written by scholars from a diversity of fields and institutions the essays in this collection legitimize the liberal arts and offer visions for the role of these disciplines in the modern world From the arts pedagogy and writing to social justice the digital humanities and the African American experience the essays that comprise *Redefining Liberal Arts Education in the Twenty First Century* bring attention to the vast array of ways in which the liberal arts continue to be fundamental parts of any education In an increasingly transactional environment in which students believe a degree must lead to a specific job and set income colleges and universities should take heed of the advice from these scholars The liberal arts do not lend themselves to the capacity to do a single job but to do any job The effective teaching of critical and analytical thinking writing and speaking creates educated citizens In a divisive twenty first century world such a citizenry holds the tools to maintain a free society redefining the liberal arts in a manner that may be key to the American republic

Y. Chan, Michael O'Sullivan, 2016-10-22 This book brings together the perspectives of eminent and emerging scholars on contemporary issues relevant to the practice pedagogy and institutionalization of the humanities in the three Chinese contexts of Hong Kong Taiwan and mainland China It addresses the need to investigate how humanities discussions often exclusively drawn from and grounded in western contexts are today being played out in these three places The humanities in contemporary Chinese contexts may have different social and pedagogical roles and a consideration of them will enable people to moderate and perhaps even refute claims made in the recent re readings of the humanities As Asian universities rise in the global rankings and as east west university collaborations and partnerships become more common it is important that the nature practice and institutionalization of the humanities in Hong Kong Taiwan and mainland China are explored and described for English readers Exploring new perspectives arising from an examination of the humanities in these places this volume aims neither to establish a position of polarity which would pit western sites against Chinese ones nor to argue for universal sameness Rather the goal is to find nuanced correspondences and differences between these various backgrounds so that there is a greater understanding of the specificities of Chinese contexts This will help shed light not only on the contexts in question but also potentially on how to rearticulate the importance of the humanities in general creating an intercultural dialogue focused on the humanities As the global university strives to move the different traditions of learning closer together through international rankings rubrics and shared research agendas it is important that we explore these locations of potential cultural exchange Social Media and Genre Studies Thomas Kenny, 2023-04-11 This book investigates whether Facebook and Twitter have become a genre of media for higher education institutions Thomas Kenny has conducted a mixed methods study using a combination of content analysis and interviews with social media employees to explore the purpose form and functionality of these web pages Ultimately Kenny argues that while institutional web pages on Facebook and Twitter do constitute a genre each is a separate and distinct platform that works differently with varying goals structure and effectiveness associated with them Scholars of communication information

Leslie, Marna Atkin, 2009-06-02 Cruise your way to the Ivy League It s no secret that it s harder to get into college these days Ivy League and other selective schools have record numbers of applicants making the competition even steeper This must have guide carefully explores the to do s to gain admission to a top tier school Students and parents will learn about choosing the right school what college admissions officers really consider when making their decisions early decision versus early action and what being on the waitlist means Provides sample essays recommendation forms resources and websites Includes advice from guidance counselors and admission officers of top colleges Between now and 2015 there will be more than 3 million high school graduates each year **Loving the Tasmanian Devil** Maureen McCarthy Bartlett, 2011-05-31 Having a partner with ASD can feel like a roller coaster ride for the neurotypical spouse In sharing the ups the downs the growth and the regression in their particular journey the author hopes that others on a similar path may find humor recognition and ways to view the unique life of loving an Aspergian from a new angle **The Market Imperative** Robert Zemsky, Susan Shuman, 2017-12-22 Thinking about American higher education as an economic market changes everything It is no surprise that college tuition and student debt are on the rise Universities no longer charge tuition to simply cover costs They are market enterprises that charge whatever the market will bear Institutional ambition along with increasing competition for students now shape the economics of higher education In *The Market Imperative* Robert Zemsky and Susan Shuman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education Instead of functioning as a single integrated industry higher education is in fact a collection of segmented and more or less separate markets These markets have their own distinctive operating constraints and logics especially regarding price But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared the victim of weak imaginations insufficient funding and an aversion to targeted investment Chapter by chapter this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape how the market for higher education distributes students among competing institutions what the job market is looking for how markets differ across the fifty states and how the higher education market determines the kinds of faculty at different kinds of institutions The volume concludes with a three pronged set of policies for making American higher education mission centered as well as market smart Although there is no one size fits all approach for reforming higher education this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education **College Access and Opportunity Guide 2011** ,
