History 101, 1979 The 101 Best Graphic Novels Stephen Weiner, 2005 Provides a concise guide to the best graphic novels that are currently in print and available written by an enthusiast and expert in this popular field Irreverence and the Sacred Hugh B. Urban, Greg Johnson, 2019 Irreverence and the Sacred brings together some of the most cutting edge interdisciplinary and international scholars working today in order to debate key issues in the critical and comparative study of religion The project is inspired in large part by the work of Bruce Lincoln whose influential and wide ranging scholarship has consistently posed challenging provocative and often irreverent questions that have really pushed the boundaries of the field of religious studies in important sometimes controversial ways Retracing the history of the discipline of religious studies Lincoln argues that the field has tended to champion a validating feel good approach to religion rather than posing more critical questions about religious claims to authority and their role in history politics and social change A critical approach to the history of religions he suggests would focus on the human temporal and material aspects of phenomena that are claimed to have a superhuman eternal or transcendent status This volume takes up Lincoln s challenge to do better by engaging in critical analyses of four key themes in the study of religion myth ritual gender and politics The book also interrogates the politics of scholarship itself critically examining the relations of power and material interests at work in the study as well as the practice of religion The scholars involved in this project include not only some of the most important figures in the American study of religion such as Wendy Doniger Russell McCutcheon Ivan Strenski and Lincoln himself but also European scholars whose work is hugely influential overseas but not as well known in the U S such as Stefan Arvidsson Claude Calame Nicolas Meylan and others Understanding Superhero Comic Books Alex Grand, 2023-06-13 This work dissects the origin and growth of superhero comic books their major influences and the creators behind them It demonstrates how Batman Wonder Woman Captain America and many more stand as time capsules of their eras rising and falling with societal changes and reflecting an amalgam of influences The book covers in detail the iconic superhero comic book creators and their unique contributions in their quest for realism including Julius Schwartz and the science fiction origins of superheroes the collaborative design of the Marvel Universe by Jack Kirby Stan Lee and Steve Ditko Jim Starlin s incorporation of the death of superheroes in comic books John Byrne and the revitalization of superheroes in the modern age and Alan Moore s deconstruction of superheroes Globalization in World History Peter N. Stearns, 2009-10-20 Globalization in World History examines major changes in global interactions from 1000 CE onward and defines four major turning points that have accelerated the process of globalization It argues that although the term is a relatively new one the process of globalization has roots much further back in time **Irwin Allen Television Productions, 1964-1970** Jon Abbott, 2015-06-14 Before establishing himself as the master of disaster with the 1970s films The Poseidon Adventure and The Towering Inferno Irwin Allen created four of television s most exciting and enduring science fiction series Voyage to the Bottom of the Sea Lost in
