The Business Who's who of Australia A. Mullane, D. G. King, 1970 **Niles' National Register** , 1811

Army-Navy-Air Force Register and Defense Times , 1915 *The Neoliberal Age?* Aled Davies, Ben Jackson, Florence Sutcliffe-Braithwaite, 2021-12-07

The late twentieth and early twenty first centuries are commonly characterised as an age of neoliberalism in which individualism competition free markets and privatisation came to dominate Britain s politics economy and society This historical framing has proven highly controversial within both academia and contemporary political and public debate Standard accounts of neoliberalism generally focus on the influence of political ideas in reshaping British politics according to this narrative neoliberalism was a right wing ideology peddled by political economists think tanks and politicians from the 1930s onwards which finally triumphed in the 1970s and 1980s The Neoliberal Age suggests this narrative is too simplistic Where the standard story sees neoliberalism as right wing this book points to some left wing origins too where the standard story emphasises the agency of think tanks and politicians this book shows that other actors from the business world were also highly significant Where the standard story can suggest that neoliberalism transformed subjectivities and social lives this book illuminates other forces which helped make Britain more individualistic in the late twentieth century The analysis thus takes neoliberalism seriously but also shows that it cannot be the only explanatory framework for understanding contemporary Britain The book showcases cutting edge research making it useful to researchers and students as well as to those interested in understanding the forces that have shaped our recent past *The Principles of Personal Property Law* Duncan Sheehan, 2017-05-18

The law of personal property covers a very wide spectrum of scenarios and unfortunately has had little detailed scrutiny of its overarching structure over the years It is a system and can best be understood as a system Indeed without understanding it as a system it becomes much more difficult to comprehend The second edition of this acclaimed textbook continues to provide a comprehensive yet detailed coverage of the law of personal property in England and Wales It includes transfer of legal title to chattels the nemo dat rule negotiable instruments and assignment of choses in action It also looks at defective transfers of property and the resulting proprietary claims including those contingent on tracing the tort of conversion bailment and security interests By bringing together areas often scattered throughout company law commercial law trusts and tort textbooks it enables readers to see common themes and issues and to make otherwise impossible generalisations across different contexts about the nature of the concepts English law applies Throughout the book concepts are explained rigorously with reference to how they are used in commercial practice and everyday life The new edition also includes a new chapter on secured transactions law reform and introduces new material on the Cape Town Convention IP rights and other intangible property The book will be of primary interest to academics and practitioners in the area However it will also be of use to students studying commercial or personal property law **Drivers of Mangrove Forest Change and its Effects on Biodiversity and Ecosystem Services** Jennifer

Howard, Dominic A. Andradi-Brown, Valerie Hagger, Sigit Sasmito, Jared Bosire, 2022-08-25 *Wellington College Register*
 Wellington College, 1997 **Episcopal Clerical Directory 2023** Church Publishing Incorporated, 2023-09-19 A must have for every search Committee The Episcopal Clerical Directory is the biennial directory of all living clergy in good standing in the Episcopal Church more than 18 000 deacons priests and bishops It includes full biographical information and ministry history for each cleric **Medical Directory of Australia**, 1993 *Parliamentary Debates (Hansard)*. Great Britain. Parliament. House of Commons, 2014 Roster, Civil and Professional Engineers and Surveyors California. Board of Registration for Professional Engineers, 1972 **Evolution of NK-mediated target recognition under the pressure of physiologic or pathologic stimuli** Massimo Vitale, Simona Sivori, Miguel López-Botet, Daniel Olive, 2015-03-23 Since their discovery NK cells have come out as potential tools to fight cancer and viruses This finding early urged different groups to study the mechanisms governing NK cell function The identification of the MHC I specific inhibitory receptors i e KIRs NKG2A and certain Ly49 molecules allowed defining rather rapidly how NK cells could avoid self aggression and how they could be directed towards targets that were forced by viral infection or tumor transformation to down regulate MHC I expression In a second time also the repertoire of surface activating receptors addressing NK cytotoxicity towards tumors and pathogens was mostly defined In spite of the first findings however most recent studies may suggest that NK cells and their receptors might not have been evolved to kill tumor targets and perhaps they might have been only partially influenced in their evolution by the need of recognizing viruses Indeed certain NK receptors known to activate NK cell cytotoxicity NKp30 DNAM 1 NKp80 can also participate at regulatory interactions occurring between NK and myeloid cells In addition a peculiar NK cell subset which intensively populate decidua during the first trimester of pregnancy through the engagement of specific receptors and the interaction with decidual DC produce chemokines and pro angiogenic cytokines and induce Tregs Thus in this context NK cells favor decidua vascularization and development of the semiallogeneic foetus in a tolerant environment Viruses have nevertheless played an important role in shaping the NK cell receptor repertoire Several studies have unveiled clues of the evolutionary struggle between these pathogens and NK cells Different NK receptors including NKp46 NKp30 NKp44 NKG2D NKG2C Ly49 and certain KIRs have been demonstrated to recognize virus encoded or virus induced ligands The expression of TLR specifically recognizing microbial products together with the unexpected role of KIR3DL2 in shuttling these products to TLR containing endosomes have also been documented in NK cells On the other side different viral immune evasion molecules have been shown to interfere with the expression of ligands for T or NK cell activating receptors In addition viral infections can occur in the reproductive stage of life cycle and may represent a serious threat for the species propagation Thus the control of viruses together with the maintenance of foetus during pregnancy should represent major evolutionary forces in shaping NK receptors Along this line the NK mediated control of tumors should not be under the same evolutionary pressure as tumors mostly appear later in the life cycle and the recognition of tumor

encoded ligands may be less efficient as the NK cell receptors might have not been selected for such aim This may be the reason why although displaying strong antitumor activity in vitro NK cells could hardly contain tumor burden in vivo In addition the pathogen driven evolution of NK cell function may also favor the role of NK cells in the insurgence of immune mediated diseases This research topic will collect contributions that may clarify the relationships between the evolution of the NK receptors and their role in an efficient recognition of viruses and tumor cells or in immune mediated diseases
