Wikipedia contributors, *New Financing for Distressed Businesses in the Context of Business Restructuring Law* Sanford U. Mba, 2019-06-29 This book focuses on the restructuring of distressed businesses emphasizing the need for new financing during the restructuring process as well as during relaunch and examines the role of law in encouraging creditor confidence and incentivizing lending It describes two broad approaches to encouraging new finance during restructuring a prescriptive one that seeks to attract credit using expressly defined statutory incentives and a market based one that relies on the business judgment of lenders against the backdrop of transaction avoidance rules Securing new financing for a distressed business is a critical part of successful restructuring Without such financing the business may be unable to meet interim liquidity constraints or to implement its restructuring plans This book addresses related questions concerning the place of new financing as an essential component of restructuring In general terms the book explores how statutory interventions and the courts can provide support with contentious issues that arise from the provision of new financing whether through new financing agreements or through distressed debt investors who are increasingly gaining prominence as sources of new financing for distressed businesses It argues that courts play a key part in preventing or correcting the imbalances that can arise from the participation of distressed debt investors In this context it critically examines the distressed debt market in

emerging markets like Nigeria and the opportunity presented by non performing loans arguing that the regulatory pattern of market entry may disincentivize distress debt investing in a market that is in dire need of financing The book offers a fresh and comparative perspective on restructuring new financing for distressed businesses by comparing various approaches primarily from the US UK and Germany and drawing lessons for frontier markets with particular reference to Nigeria It fills an important gap in international comparative scholarship and discusses a living problem with both empirical and policy aspects Situating Global Art Sarah Dornhof,Nanne Buurman,Birgit Hopfener,Barbara Lutz,2018-09-05 In recent years the

term global art has become a catchphrase in contemporary art discourses Going beyond additive notions of canon expansion this volume encourages a differentiated inquiry into the complex aesthetic cultural historical political epistemological and socio economic implications of both the term global art itself and the practices it subsumes Focusing on diverse examples of art curating historiography and criticism the contributions not only take into account new hegemonies and exclusions but also the shifting conditions of transcultural art production circulation and reception
