Leapfrogging Africa Reiner Klingholz, Sabine Sütterlin, Alisa Kaps, Catherina Hinz, 2020-10-15 In this study we look at the potential for development leaps in Africa in three key sectors that provided the basis for socioeconomic development around the world: health, education and agriculture. Advances in these sectors increase the human capital, create jobs and economic opportunities and have a positive influence on each other. Healthy and well-fed children can learn better, hygiene and better medical care diminish infant mortality which reduces the desire for a large number of children, education for women promotes gender equality and causes birth rates to fall further. This creates a population structure under which the economy can grow particularly well; a demographic dividend becomes possible.
