Carbonate Fuel Cell Technology Isamu Uchida,1999 Molecular Mechanisms of Tumor Cell Resistance to Chemotherapy Benjamin Bonavida,2013-07-04 This volume gives the latest developments in on the mechanisms of cancer cell resistance to apoptotic stimuli which eventually result in cancer progression and metastasis One of the main challenges in cancer research is to develop new therapies to combat resistant tumors The development of new effective therapies will be dependent on delineating the biochemical molecular and genetic mechanisms that regulate tumor cell resistance to cytotoxic drug induced apoptosis These mechanisms should reveal gene products that directly regulate resistance in order to develop new drugs that target these resistance factors and such new drugs may either be selective or common to various cancers If successful new drugs may not be toxic and may be used effectively in combination with subtoxic conventional drugs to achieve synergy and to reverse tumor cell resistance The research developments presented in this book can be translated to produce better clinical responses to resistant tumors **Art Meets Mathematics in the Fourth Dimension** Stephen Leon Lipscomb,2014-10-13 To see objects that live in the fourth dimension we humans would need to add a fourth dimension to our three dimensional vision An example of such an object that lives in the fourth dimension is a hyper sphere or 3 sphere The quest to imagine the elusive 3 sphere has deep historical roots medieval poet Dante Alighieri used a 3 sphere to convey

his allegorical vision of the Christian afterlife in his Divine Comedy In 1917 Albert Einstein visualized the universe as a 3 sphere describing this imagery as the place where the reader s imagination boggles Nobody can imagine this thing Over time however understanding of the concept of a dimension evolved By 2003 a researcher had successfully rendered into human vision the structure of a 4 web think of an ever increasingly dense spider s web In this text Stephen Lipscomb takes his innovative dimension theory research a step further using the 4 web to reveal a new partial image of a 3 sphere Illustrations support the reader s understanding of the mathematics behind this process Lipscomb describes a computer program that can produce partial images of a 3 sphere and suggests methods of discerning other fourth dimensional objects that may serve as the basis for future artwork
