from Siberia to Alaska and began the last chapter in the human settlement of the earth. Many left little or no trace. But one group, the Early Paleo Indians, exploded onto the archaeological record about 11,500 radiocarbon years ago and expanded rapidly throughout North America, sending splinter groups into Central and perhaps South America as well. Journey to the Ice Age explores the challenges faced by the Early Paleo Indians of northeastern North America. A revealing autobiographical account, this is at once a captivating record of Storck's discoveries and an introduction to the practice, challenges, and spirit of archaeology.

The Story of a Forest Robert Kuhn McGregor, 2018-02-13 The re-established forests of the Upper Delaware exist as a living reminder of centuries of both exploitation and good intentions. Emerging after the last glaciation, they were first modified by Native Americans to promote hunting and limited agriculture. The forests began to disappear as Europeans cleared farmland and fed sawmills and tanneries. The advent of the railroad accelerated demand, and within 30 years industry had consumed virtually every mature tree in the valley, leaving barren hillsides subject to erosion and flooding. Even as unchecked cutting continued, conservation efforts began to save what little remained. A century and a half later, a forest for the 21st century has emerged: an ecological
