The Age Of Supported Independence Voices Of In Home Care:

The Age of Supported Independence Beatrice Hale, Patrick Barrett, Robin Gauld, 2010-04-06 This book investigates the experiences of older people who remain at home with care. It examines the transition points for the important life changes faced by family members who take on a greater care giving role. The book draws on demographic analyses and qualitative fieldwork to explore the shift from independence to increasing dependence and suggests that this transition constitutes movement into a new stage of life that of an Age of Supported Independence. Applying the anthropological concept of rites of passage in their analysis the authors focus on the changes in everyday living within the spatial environment of the home, the temporal organization of daily life and the reshaping of relationships. They suggest that many older people as well as the family members who become carers remain in a state of liminality unable to make sense of their new situation and experience and despite assumptions that ageing in place sustains social connectedness excluded from their communities.
