The American Scholar Essay Summary:

The American Scholar Ralph Waldo Emerson, 2020-09-28 I greet you on the re commencement of our literary year Our anniversary is one of hope and perhaps not enough of labor We do not meet for games of strength or skill for the recitation of histories tragedies and odes like the ancient Greeks for parliaments of love and poesy like the Troubadours nor for the advancement of science like our cotemporaries in the British and European capitals Thus far our holiday has been simply a friendly sign of the survival of the love of letters amongst a people too busy to give to letters any more As such it is precious as the sign of an indestructible instinct Perhaps the time is already come when it ought to be and will be something else when the sluggard intellect of this continent will look from under its iron lids and fill the postponed expectation of the world with something better than the exertions of mechanical skill Our day of dependence our long apprenticeship to the learning of other lands draws to a close The millions that around us are rushing into life cannot always be fed on the sere remains of foreign harvests Events actions arise that must be sung that will sing themselves Who can doubt that poetry will revive and lead in a new age as the star in the constellation Harp which now flames in our zenith astronomers announce shall one day be the pole star for a thousand years

International de la Haye, Enemy Images in American History Ragnhild Fiebig-von Hase, Ursula Lehmkuhl, 1998-01-01 It seems to be a tenet of the human condition to perceive others as different and potentially hostile In nearly all societies stereotypes are developed to stigmatize suspected enemies within and without The American case is particularly interesting in this respect because American society consists of nothing but others to be open to others and welcome those who are different is one of the basic tenets of the country However this principle often conflicts with the need to integrate all these strangers into a homogeneous governable society which causes the formation of hostile stereotypes of certain ethnic groups that do not fit in The authors in this volume look at the development of these enemy images which form a fairly consistent pattern from the period of the American Revolution to the post World War II era In doing so they focus on the question of to what extent these enemy images influence the formulation and outcome of foreign domestic and immigration policies
