*Mathematics of the 19th Century* Andrei N. Kolmogorov, Adolf-Andrei P. Yushkevich, 2012-12-06 The general principles by

which the editors and authors of the present edition have been guided were explained in the preface to the first volume of *Mathematics of the 19th Century* which contains chapters on the history of mathematical logic algebra number theory and probability theory Nauka Moscow 1978 English translation by Birkhäuser Verlag Basel Boston Berlin 1992 Circumstances beyond the control of the editors necessitated certain changes in the sequence of historical exposition of individual disciplines The second volume contains two chapters history of geometry and history of analytic function theory including elliptic and Abelian functions the size of the two chapters naturally entailed dividing them into sections The history of differential and integral calculus as well as computational mathematics which we had planned to include in the second volume will form part of the third volume We remind our readers that the appendix of each volume contains a list of the most important literature and an index of names The names of journals are given in abbreviated form and the volume and year of publication are indicated if the actual year of publication differs from the nominal year the latter is given in parentheses The book *History of Mathematics from Ancient Times to the Early Nineteenth Century* in Russian which was published in the years 1970 1972 is cited in abbreviated form as HM with volume and page number indicated The first volume of the present series is cited as Bk 1 with page numbers
