**Do not lift the machine with a person in the cab or on the machine.**  
Use certified cables, slings, shackles and hooks of adequate load rating.  
Always lift the machine as shown below. Improper rigging can allow the load to shift and cause injury or damage.

	A		B		C		D	
	500	1000	10	20	500	1000	10	20
EC-3000	1000	1000	10	20	500	1000	10	20

Lift the machine on flat, firm and level ground.

1. Start the engine, and set the attachment as illustrated. Position the upper structure (boom) forward over the tires.
2. Move the safety locking lever down to lock the system securely. See Safety locking system on page 88.
3. Stop the engine, check the safety around the machine, then close and lock the front window cab door, and engine hood securely.
4. As shown in the illustration, connect lifting cables or slings with sufficient strength for the machine weight at the lifting points correctly.
5. After installation of all hoisting equipment, lift the machine a little to check its balance. If satisfactory, lift it slowly and evenly.

## Counterweight removal and installation

### Standard machine

Move the safety locking lever down to lock the system securely. See Safety locking system on page 88, and attach a warning tag (do not start the engine) to the left operating lever.

Use certified cables and shackles of adequate load rating. Improper lifting can allow the load to shift and cause injury or death.

### Counterweight removal

1. Position the machine on flat, firm and level ground, free from any obstructions or interference.
2. Keep the service position.
3. Put the safety locking lever securely. See Safety locking system on page 88.
