points of the book are summarized as follows First for most poor countries learning innovation is considered the key to economic growth rather than leading edge innovation which is a more popular theme in similar books on innovation Second an overwhelming majority of innovations currently used in poor countries are developed in advanced countries so technology transfer and learning from the latter are a fundamental source of innovation in the former Third a surprisingly high rate of firms around 50% reported that they introduced new or significantly improved products or processes in poor countries and this high innovation rate is a great benefit to be enhanced by government policies Fourth the common factors driving innovation of manufacturing firms in Vietnam and Laos are 1 human capital 2 social capital and 3 innovation in the past Fifth the impact of innovation on firm performance is found to be mixed in these countries Sixth so far almost all studies on innovation have focused on product or process innovation but additional light is shed here on organizational innovation
