Microfinance and Poverty Alleviation Ben Quinones, Joe Remenyi, 2014-02-04 Despite the considerable economic growth of the Asia Pacific poverty continues to be a major problem One key way to create sustainable livelihoods and to provide poor households an escape route from poverty is microfinance Since the early 1980s microfinance practitioners have proven that the poor are creditworthy capable of utilizing scarce capital efficiently in viable income generating projects and able to pay back their loans This book collects the experience of microfinance practitioners in 11 countries in the Asia Pacific region to describe the present state of the art It is designed to provide an overview of the subject why it is so essential to poverty reduction what is the best practice what kind of policy framework and regulatory environment is required It offers both an extensive survey of the academic literature and

a selection of case studies all from authors who have been active practitioners in microfinance for many years The case studies cover four key countries in South Asia and three countries in East Asia in which microfinance had become particularly important There is also a regional chapter covering the Pacific islands

Water Law for the Twenty-First Century Philippe Cullet, Alix Goulland-Gualtieri, Roopa Madhav, Usha Ramanathan, 2009-10-27 This volume critically analyses legal issues arising under international law concerning the consequences of proposed water regulatory changes and their implementation The book looks at reforms in India in order to ask broader questions about the relevance of international law in national law and policy making

Climate Change and Natural Disasters Vinod Thomas, 2017-01-31 The start of the new millennium will be remembered for deadly climate related disasters the great floods in Thailand in 2011 Super Storm Sandy in the United States in 2012 and Typhoon Haiyan in the Philippines in 2013 to name a few In 2014 17.5 million people were displaced by climate related disasters ten times more than the 1.7 million displaced by geophysical hazards What is causing the increase in natural disasters and what effect does it have on the economy Climate Change and Natural Disasters sends three messages human made factors exert a growing influence on climate related disasters because of the link to anthropogenic factors there is a pressing need for climate mitigation and prevention including climate adaptation ought not to be viewed as a cost to economic growth but as an investment Ultimately attention to climate related disasters arguably the most tangible manifestation of global warming may help mobilize broader climate action It can also be instrumental in transitioning to a path of low carbon green growth improving disaster resilience improving natural resource use and caring for the urban environment Vinod Thomas proposes that economic growth will become sustainable only if governments political actors and local communities combine natural disaster prevention and controlling climate change into national growth strategies When considering all types of capital particularly human capital climate action can drive economic growth rather than hinder it

The Global Emergence of Constitutional Environmental Rights Joshua C. Gellers, 2017-05-18 Over the past 40 years countries throughout the world have similarly adopted human rights related to environmental governance and protection in national constitutions Interestingly these countries vary widely in terms of geography politics history resources and wealth This raises the question why do some countries have constitutional environmental rights while others do not Bringing together theory from law political science and sociology a global statistical analysis and a comparative study of constitutional design in South Asia Gellers presents a comprehensive response to this important question Moving beyond normative debates and anecdotal developments in case law as well as efforts to describe and categorize such rights around the world this book provides a systematic analysis of the expansion of environmental rights using social science methods and theory The resulting theoretical framework and empirical evidence offer new insights into how domestic and international factors interact during the constitution drafting process to produce new law that is both locally relevant and globally resonant Scholars practitioners and students of law political science and sociology interested in understanding how

institutions cope with complex problems like environmental degradation and human rights violations will find this book to be essential reading
