World Civilizations Peter N. Stearns, Michael Adas, Stuart B. Schwartz, 2001 The primary goal of World Civilizations is to present a TRULY GLOBAL HISTORY one that both discusses the development of the world's leading civilizations and also emphasizes the major stages in the interactions among different peoples and societies World Civilizations examines all the world's civilizations including those in the Western tradition but also those civilizations sometimes neglected in world history texts for example the nomadic societies of Asia Latin America and the nations and states of the Pacific Rim World Civilizations balances this discussion of independent developments in all the world's major civilizations with comparative analysis of the results of international contact World Civilizations organizes its presentation of global history into SIX COHERENT TIME PERIODS with each period defined by the new and parallel patterns that evolved among all or most civilizations during the particular era The six periods correspond to the six parts of the book Within each part the authors identify specific themes that characterize common experiences or common forces in individual societies as well as the new kinds and patterns of global contacts that emerged during the era Thus for example Part I of the book discusses the developmental stage of world history including the rise of agriculture and the development of civilization Part II examines the classical era in global history an era marked by the integration of large regions and diverse groups of people through overarching cultural and political systems Subsequent parts of the book continue the emphasis on geographic shifts and the intensification of contact among civilizations

World Civilizations, 2004

World Civilizations Peter N. Stearns, Michael Adas, Stuart B. Schwartz, Marc Jason Gilbert, 2020 World history explores the human past around the globe to help us understand the world we live in today It seeks to identify how major forces like patterns of migration or world trade have developed over time It explores the cultures and political institutions of different regions to help explain commonalities and differences World history builds on a growing body of historical scholarship some of which has truly altered the picture of the past It involves a rich array of stories and examples of human variety intriguing in themselves It helps develop skills that are vital not just to the history classroom but to effective operation in a global society skills like comparing different societies appreciating various viewpoints and identifying big changes and continuities in the human experience Always however it uses the past as a prologue to the present World

historians argue that no one society past or present can be understood without reference to other societies and to larger global forces They argue even more vigorously that the present which clearly involves relationships that embrace the whole world cannot be grasped without a sense of the global historical record From its first edition *World Civilizations The Global Experience* has aimed at capturing a truly global approach by discussing and comparing major societies and focusing on their interactions The goal is to present a clear factual framework while stimulating analysis about global contacts regional patterns and the whole process of change and continuity on a world stage This kind of world history focused on the development over time of the forces that shape the world today helps students make sense of the present and prepare to meet the challenges of the future It is hard to imagine a more important topic Embracing the whole world s history obviously requires selectivity and explicit points of emphasis This text gains coherence through decisions about time about place and about topic In all three cases the book encourages analysis relating facts to vital issues of interpretation Through analysis and interpretation students become active engaged learners rather than serving as passive vessels for torrents of historical facts Underpinning analysis the issues of time place and topic are the three keys to an intelligible global past *The Global Experience* Philip F. Riley, Frank A. Gerome, Henry Myers, Chong-Kun Yoon, 2002 Broad in scope and integrative in perspective this anthology offers a brief balanced collection of challenging but accessible primary materials that cover World History since the 1500s Organized chronologically drawn from a variety of genres and focused on global themes the selections are genuinely representative of diverse civilizations at different points of their development This wide ranging and world focus features selections from anthropology comparative literature drama economics geography law philosophy political theory poetry religion science and sociology It looks at early modern political economy nationalism romanticism racism World War I diplomacy patterns of genocide and much more For individuals embarking upon a critical and analytical journey through the history of the world ***The Global Experience: Readings in world history to 1550*** Philip F.
