Citizens of the World Megan Threlkeld,2022-05-10 Between 1900 and 1950 many internationalist U S women referred to themselves as citizens of the world This book argues that the phrase was not simply a rhetorical flourish it represented a demand to participate in shaping the global polity and an expression of women s obligation to work for peace and equality The nine women profiled here invoked world citizenship as they promoted world government a permanent machinery to end war whether in the form of the League of Nations the United Nations or a full fledged world federation These women agreed neither on the best form for such a government nor on the best means to achieve it and they had different definitions of peace and different levels of commitment to genuine equality But they all saw themselves as part of a global effort to end war that required their participation in the international body politic Excluded from full national citizenship they saw in the world polity opportunities for engagement and equality as well as for peace Claiming world citizenship empowered them on the world stage It gave them a language with which to advocate for international cooperation Citizens of the World not only provides a more complete understanding of the kind of world these women envisioned and the ways in which they claimed membership in the global community It also draws attention to the ways in which they were excluded from international institution building and to the critiques many of them leveled at those institutions Women s arguments for world government and their practices of world citizenship represented an alternative reaction to the crises of the first half of the twentieth century one predicated on cooperation and equality rather than competition and force

Paquette, 2016-01-15 By 2020 half of the world's population and most university students will have a supercomputer in their pockets. This revolution will affect the way students respond to higher education. The university classroom must henceforth engage students and the classic lecture format alone might not be enough to do so. This book answers the question how university students can learn in the classroom what they cannot learn in any other way. The answer is inspired by options that are not available to political scientists in the way that they are in the laboratories for the sciences, in the performances for the live arts, and in the studios for visual arts, as well as ideas that are already present but not widespread in the discipline: problem solving and case studies as in the professional schools and simulation exercises in many other disciplines. This book proposes therefore an active pedagogy for political science at a time when active pedagogy is more important than ever. Prof. Laure Paquette, PhD, has been a visiting researcher or professor in 23 countries. She has advised several foreign governments as well as her own, Canada, and has published extensively in four languages. This is her sixteenth book. **Awakening**

Democracy through Public Work Harry C. Boyte, 2021-04-30 In the face of authoritarian, divisive trends and multiplying crises when politics as usual is stymied, *Awakening Democracy through Public Work* shows it is possible to build foundations for a democratic awakening grounded in deep American traditions of a citizen-centered commonwealth. *Awakening Democracy through Public Work* begins with the story of Public Achievement, a youth civic education and empowerment initiative with roots in the civil rights movement. It describes Public Achievement's first home in St. Bernard's, a low-income Catholic elementary school in St. Paul, Minnesota, and how the program spread across the country and then abroad, giving birth to the larger concept of public work. In Public Achievement, young people practice citizen politics as they tackle issues ranging from bullying, racism, and sexual harassment to playground improvements, curriculum changes, and better school lunches. They develop everyday political skills for working across differences and making constructive change. Such citizen politics, more like jazz than a set piece of music, involves the interplay and negotiation of diverse interests and views, sometimes contentious, sometimes harmonious. Public Achievement highlights young people's roles as co-creators, builders of schools, communities, and democratic society. They are not citizens in waiting but active citizens who do public work. *Awakening Democracy through Public Work* also describes how public work can find expression in many kinds of work, from education and health to business and government. It is relevant across the sweep of society. People have experimented with the idea of public work in hundreds of settings in thirty countries, from Northern Ireland and Poland to Ghana and Japan. In Burundi, it birthed a national initiative to rework relations between villagers and police. In South Africa, it helped people in poor communities to see themselves as problem solvers rather than simply consumers of government services. In the US, at Denison University, public work is being integrated into dorm life. At Maxfield School in St. Paul, it is transforming special education. In rural Missouri, it led to the emPowerU initiative of the Heartland Foundation, encouraging thousands of young people to stay in the region. In Eau Claire, Wisconsin, it generated Clear Vision, a program providing government support for

citizen led community improvements Public work has expanded into the idea of citizen professionals working with other citizens not on them or for them It has also generated the idea of civic science in which scientists see themselves as citizens and science as a resource for civic empowerment Awakening Democracy through Public Work shows that we can free the productive powers of people to work across lines and differences to build a better society and create grounded hope for the future

Care at the End of the World Jina B. Kim,2025-03-21 In Care at the End of the World Jina B Kim develops what she calls crip of color critique bringing a disability lens to bear on feminist and queer of color literature in the aftermath of 1996 US welfare reform and the subsequent evisceration of social safety nets She examines literature by contemporary feminist queer and disabled writers of color such as Jesmyn Ward Octavia Butler Karen Tei Yamashita Samuel Delany and Aurora Levins Morales who each bring disability and dependency to the forefront of their literary freedom dreaming Kim shows that in their writing liberation does not take the shape of the unfettered individual or hinge on achieving independence Instead liberation emerges by recuperating dependency cultivating radical interdependency and recognizing the numerous support systems upon which survival depends At the same time Kim demonstrates how theories and narratives of disability can intervene into state authored myths of resource parasitism such as the welfare queen In so doing she highlights the alternate structures of care these writers envision and their dreams of life organized around reciprocity and mutual support
