Climate Change as a Security Risk Hans Joachim Schellnhuber, 2010-09-23 Without resolute counteraction climate change will overstretch many societies adaptive capacities within the coming decades. This could result in destabilization and violence jeopardizing national and international security to a new degree. However climate change could also unite the international community. This is provided that we recognize climate change as a threat to humankind and so set the course for adopting a dynamic and globally coordinated climate policy.
