The forty-four articles in this book take stock of the history evolving literature and current trajectories of new world history. These essays together with the editors' introductions to thematic chapters encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers, and today's practitioners changing concepts of world historical space and time, comparative methods, environmental history, the big history movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.

Public Administration, Sixth Edition, A Comparative Perspective. Ferrel Heady, 2001-02-13 Continuing in the standard of excellence set by previous editions, this sixth edition assesses the bureaucracies and development of governments around the world, providing helpful and revealing analyses of the relationships between bureaucracies and political regimes. With over 1000 literature references, tables, and drawings, the book has been updated to reflect changes in the political systems of the former Soviet Union, Eastern Europe, and the developing world. The editor clearly articulates recent developments in the shifting global political landscape and discusses how conditions in development administration and comparative public policy affect nation-states.

The Heritage of World Civilizations Albert M. Craig, 2003 This comprehensive, accessible survey of world history has been extensively revised to provide an even more global and comparative perspective on the events and processes that have shaped our increasingly interdependent world. Written by leading scholars in their respective fields, *Heritage of World Civilizations* 6e combines unusually strong and thorough coverage of the unique heritage of Asian, African, Islamic, Western, and American civilizations while highlighting the role of the world's great religious and philosophical traditions. Interactive maps: one Web-based interactive map in each chapter provides readers with opportunities to explore the relationships between time and space in shaping world history. A three-volume organization available in A, B, C splits: Volume A covers antiquity to 1300; Volume B covers the period from 1300-1850; and Volume C covers the Enlightenment to the present. Sixth editions now provide roughly the same amount of coverage for European and non-European regions. Volumes include European events during the High Middle Ages and Renaissance; extensive discussion of globalization, terrorism, and the challenges facing the world in the 21st century; revised coverage of the ancient world; treatment of the origins of humankind has been completely rewritten to reflect the newest scholarship; provides significant new coverage of women in ancient Greece and Rome. For anyone interested in world civilization or world history.
