Urban Water Security: Managing Risks Blanca Jimenez Cisneros,Joan B. Rose,2009-03-24 Understanding the impacts of urbanization on the urban water cycle and managing the associated health risks demand adequate strategies and measures Health risks associated with urban water systems and services include the microbiological and chemical

contamination of urban waters and outbreak of water borne diseases mainly due to poor water and s Emergency Policy

Allan McConnell,2017-03-02 This volume of leading scholarly articles addresses the international dynamics of emergency policy and practice In a world of increasing technological economic and political interdependency it is no longer feasible for states to ignore the pervasive influence of globalisation The crises wrought by industrial disasters catastrophic weather events pandemics financial implosion and cyber intrusion now transcend and challenge national interests with increasing frequency The case studies collected here explore these global dimensions of crisis and the state through the lenses of planning and prevention acute responses recovery and reconstruction and learning about crisis This collection is essential reading for academics policy officials and practitioners with an interest in emergency management risk management and issues of national global security In original introductory and concluding chapters to the volume Legrand and McConnell provide a critical perspective on the challenges that globalisation presents to policymakers under crisis conditions and signposts some of the emerging challenges to the state and international community **Handbook of Critical Incident Analysis** Richard W Schwester,2014-12-18 Critical incidents all too often explode onto the social conscious and challenge our sense of security This comprehensive handbook brings together a range of experts who provide a foundation for the field of critical incident analysis by examining specific incidents9 11 the Virginia Tech massacre the H1N1 pandemic the BP oil spill and more through various methodological and disciplinary lenses This groundbreaking book develops a new organizational theory derived from ideas in statistics and psychometrics The author s core premise is that errors known to occur in social science research must also occur when managers look at their data and seek to make inferences about cause and effect Statistico organizational theory uses methodological principles to predict when errors occur and how great they will be Expanding on this concept The Meta Analytic Organization offers new theoretical propositions about organizational strategy and structure with wide application to human resource management international business and more *The Political Economy of Hazards and Disasters* Eric C. Jones,Arthur D. Murphy,2009-05-16 Throughout history societies have had to decide whom to sacrifice and whom to help in times of disaster This volume examines how elite groups attempt to maintain power through the use of particular economic political and ideological instruments and how both ruling elites and common people endeavor to create meaningful traditions while enduring hardship The Political Economy of Hazards and Disasters demonstrates how vulnerability is economically constructed primary producers adapt their production regimes how traders and merchants adapt their practices and how political economic objectives play out in recovery efforts *Disasters and Social Resilience* Helen J. Boon,Alison Cottrell,David King,2016-05-20 The interconnectedness of communities organisations governing bodies policy and individuals in the field of disaster studies has never been accurately examined or comprehensively modelled This kind of study is vital for planning policy and emergency responses and assessing individual and community vulnerability resilience and sustainability as well as mitigation and adaptation to climate change impacts it

therefore deserves attention Disasters and Social Resilience fills this gap by introducing to the field of disaster studies a fresh methodology and a model for examining and measuring impacts and responses to disasters Urie Bronfenbrenner's bioecological systems theory which is used to look at communities holistically is outlined and illustrated through a series of chapters guiding the reader from the theory's underpinnings through research illustrations and applications focused on each level of Bronfenbrenner's ecosystems culminating in an integration chapter The final chapter provides policy recommendations for local and national government bodies and emergency providers to help individuals and communities prepare and withstand the effects of a range of disasters This book will be of great interest to scholars and students of disaster and emergency management disaster readiness and risk reduction DRR and to scholars and students of more general climate change and sustainability studies

Natural Disasters and Extreme Events in Agriculture Mannava VK Sivakumar, Raymond P. Motha, Haripada P. Das, 2005-12-06 Agricultural production is highly dependent on weather climate and water availability and is adversely affected by the weather and climate related disasters Droughts and natural disasters such as floods can result in crop failures food insecurity famine loss of property and life mass migration and negative national economic growth It may not be possible to prevent the occurrence of these natural disasters but the resultant disastrous effects can be reduced considerably through proper planning and effective preparation Vulnerability associated with the hazards of natural disasters can be controlled to some extent by accurate and timely prediction and by taking counter measures to reduce their impacts on agriculture This book based on an expert meeting held in Beijing China should be of interest to all organizations involved in disasters reduction and mitigation of extreme events

Disaster Law Amita Singh, 2017-07-28 This book looks at how legal frameworks can and do reduce risks arising out of disasters The volume analyses existing disaster laws and the challenges on the ground brings together case studies from some of the most vulnerable regions and proposes solutions to avert existing and possible future crises The book offers appropriate legal frameworks for disaster management which could not only offer sustainable institutional reforms towards community resilience and preparedness but also reduce risk within the frameworks of justice equity and accountability It examines the intricacies of governance within which governments function and discusses how recent trends in infrastructure development and engineering technology could be balanced within the legal principles of ethics transparency and integrity The chapters in the volume suggest that legal frameworks ought to resonate with new challenges of resource management and climate change Further these frameworks could help secure citizens trust institutional accountability and effective implementation through an unceasing partnership which keeps the community better prepared and more resilient This volume will be indispensable to scholars and researchers of disaster management law public policy environment and development studies as well as policymakers and those in administrative governmental judicial and development sectors

International Disaster Response Law Andrea de Guttery, Marco Gestri, Gabriella Venturini, 2012-08-31 With a Foreword by Kristalina Georgieva

European Commissioner for International Cooperation Humanitarian Aid and Crisis Response Over the last decades natural and man made disasters have been increasing in terms of frequency size number of people affected and material damage caused There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention mitigation and response The implementation of these frameworks however poses serious challenges This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps The authors address the rights and duties of States in preventing and mitigating disasters in facilitating access to their territory for humanitarian relief actors as well as issues related to liability and compensation Due attention is paid to European Union law governing disaster response and to its reform in the light of the Lisbon Treaty and to the main trends in domestic legislation Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed Additional topics such as the status of relief personnel the hindrances to the delivery of relief consignments by customs and excise administration the use of civilian and military defence assets in emergency situations the mechanisms and procedures available to offer financial support for recovery and rehabilitation risk insurance and the issue of corruption during disaster related activities are specifically addressed By drawing on the expertise of lawyers political scientists economists and humanitarian practitioners the book promotes much needed interdisciplinary dialog and sheds light on a largely uncharted field of research It is therefore essential reading for academics and practitioners in international and EU law policy makers civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community s response to large scale calamitous events Over the last decades natural and man made disasters have been increasing in terms of frequency size number of people affected and material damage caused There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention mitigation and response The implementation of these frameworks however poses serious challenges This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps The authors address the rights and duties of States in preventing and mitigating disasters in facilitating access to their territory for humanitarian relief actors as well as issues related to liability and compensation Due attention is paid to European Union law governing disaster response and to its reform in the light of the Lisbon Treaty and to the main trends in domestic legislation Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed Additional topics such as the status of relief personnel the hindrances to the delivery of relief consignments by customs and excise administration the use of civilian and military defence assets in emergency situations the mechanisms and procedures available to offer financial support for recovery and rehabilitation risk insurance and the issue of corruption during disaster related activities are specifically addressed By drawing on the expertise of lawyers political scientists economists and humanitarian practitioners the book promotes much needed interdisciplinary dialog and sheds light on a largely uncharted

field of research It is therefore essential reading for academics and practitioners in international and EU law policy makers civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community's response to large scale calamitous events

Humanitarianism and Challenges of Cooperation Volker Heins, Kai Koddenbrock, Christine Unrau, 2016-02-05 Humanitarianism as a moral concept and an organized practice has become a major factor in world society It channels an enormous amount of resources and serves as an argument for different kinds of interference into the internal affairs of countries and regions At the same time and for these very reasons it is an ideal testing ground for successful and unsuccessful cooperation across borders Humanitarianism and the Challenges of Cooperation examines the multiple humanitarianisms of today as a testing ground for new ways of global cooperation General trends in the contemporary transformation of humanitarianism are studied and individual cases of how humanitarian actors cooperate with others on the ground are investigated This book offers a highly innovative empirically informed account of global humanitarianism from the point of view of cooperation research in which internationally renowned contributors analyse broad trends and present case studies based on meticulous fieldwork This book will be of great interest to students and researchers in the areas of political science international relations and humanitarianism It is also a valuable resource for humanitarian aid workers

Mitigation of Natural Hazards and Disasters C. Emdad Haque, 2006-02-23 For these and other reasons the findings reported in this volume will be of large significance as future policy decisions are made in a wide variety of natural and social environments GILBERT F WHITE Professor Emeritus Geography and Institute of Behavioral Science University of Colorado Colorado USA 2 C Mitigation and Adaptation Strategies for Global Change 2005 10 335 353 Springer 2005 ADAPTATION OPTIONS STRATEGIES FOR HAZARDS AND VULNERABILITY MITIGATION AN INTERNATIONAL PERSPECTIVE 1 2 C EMDAD HAQUE and IAN BURTON 1 Natural Resources Institute University of Manitoba Winnipeg Manitoba Canada 2 Institute for Environmental Studies University of Toronto Toronto Ontario Canada Author for correspondence Tel 204 474 8375 Fax 204 261 0038 E mail haquece@umanitoba.ca Received 15 May 2004 accepted in final form 17 July 2004 Abstract The broad objective of this special issue of Mitigation and Adaptation Strategies for Global Change is to address some of the gaps in our knowledge and understanding of the policies programs and measures that might be applied to natural hazards and their impacts in an era of climate change Given the global impacts of climate change and world wide pattern of increasing losses from natural hazards we necessarily adopt an international perspective The specific goals of the special issue are to encompass experiential aspects emphasizing current practice of mitigation and its associated measures and their results and to explore primary or root causes of alarming shifts in human and economic costs of environmental extremes
