Manning, 2003-05-15 World history has expanded dramatically in recent years primarily as a teaching field and increasingly as a research field Growing numbers of teachers and Ph.D.s in history are required to teach the subject They must be current on topics from human evolution to industrial development in Song dynasty China to today's disease patterns and then link these disparate topics into a coherent course Numerous textbooks in print and in preparation summarize the field of world history at an introductory level But good teaching also requires advanced training for teachers and access to a stream of new

research from scholars trained as world historians In this book Patrick Manning provides the first comprehensive overview of the academic field of world history He reviews patterns of research and debate and proposes guidelines for study by teachers and by researchers in world history Science and Technology in World History, Volume 1 David Deming, 2014-01-10

On Justice Mathias Risse, 2020-09-10 Though much attention has been paid to different principles of justice far less has been done reflecting on what the larger concern behind the notion is. In this work Mathias Risse proposes that the perennial quest for justice is about ensuring that each individual has an appropriate place in what our uniquely human capacities permit us to build, produce and maintain and is appropriately respected for the capacity to hold such a place to begin with. Risse begins by investigating the role of political philosophers and exploring how to think about the global context where philosophical inquiry occurs. Next he offers a quasi historical narrative about how the notion of distributive justice identifies a genuinely human concern that arises independently of cultural context and has developed into the one we should adopt now. Finally he investigates the core terms of this view including stringency, moral value, ground and duties of justice.
