McClellan III,Harold Dorn,2015-12-15 Arguably the best general history of science and technology ever published Tracing the relationship between science and technology from the dawn of civilization to the

early twenty first century James E McClellan III and Harold Dorn's bestselling book argues that technology as applied science emerged relatively recently as industry and governments began funding scientific research that would lead directly to new or improved technologies. McClellan and Dorn identify two great scientific traditions: the useful sciences which societies patronized from time immemorial and the exploration of questions about nature itself which the ancient Greeks originated. The authors examine scientific traditions that took root in China, India, and Central and South America as well as in a series of Near Eastern empires in late antiquity and the Middle Ages. From this comparative perspective, McClellan and Dorn survey the rise of the West, the Scientific Revolution of the seventeenth century, the Industrial Revolution, and the modern marriage of science and technology. They trace the development of world science and technology today while raising provocative questions about the sustainability of industrial civilization. This new edition of *Science and Technology in World History* offers an enlarged thematic introduction and significantly extends its treatment of industrial civilization and the technological supersystem built on the modern electrical grid. The Internet and social media receive increased attention. Facts and figures have been thoroughly updated, and the work includes a comprehensive Guide to Resources incorporating the major published literature along with a vetted list of websites and Internet resources for students and lay readers.

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church, the court, and more recently on urban space. The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches. While previous scholars examined the figure of the peasant in the premodern world, the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city. The experience in rural space was important already for writers and artists in the premodern era, as the large variety of scholarly approaches indicates. The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works. In a surprisingly large number of cases, we can even discover elements of utopia hidden in rural space. We also observe how much the rural world was a significant element already in early medieval mentality. Moreover, as many authors point out, the impact of natural forces on premodern society was tremendous, if not catastrophic.

The Thinking Past Adrian Cole, Stephen Ortega, 2014-08-26 Changes in the 21st century classroom and recent shifts in academic pedagogy suggest that information for information's sake is in the process of being phased out for a problem case based approach to learning. Students now are being asked to learn material outside of the class so they can engage in active classroom discussion and participate in different group activities. Not only content, therefore, but style in the classroom is changing fast, the flipped classroom being ever more popular. Part of the challenge for the world historian is figuring out how this type of pedagogy can be applied in a setting where the sage on the stage approach is being replaced by more interactive forms of learning. Asked to regularly

participate students are being asked not to memorize but how to think and how to evaluate the reliability of different sources of information Looking to build on interactive learning The Thinking Past is based on the premise that asking questions and evaluating sources represents a new and an insightful way of presenting material on world history While content on states such as the Songhay the Ming and the Aztecs and on nomadic people remains an important part of the work we believe that the classroom experience of debating different issues such as the origins of war and the nature of empire serves as a solid foundation for actually thinking about world history Hadith Jonathan A.C. Brown, 2017-12-07 Contrary to popular opinion the bulk of Islamic law does not come from the Quran but from hadith first hand reports of the Prophet Muhammad s words and deeds passed from generation to generation However with varying accounts often only committed to paper a century after the death of Muhammad Islamic scholars past and present have been faced with complex questions of historical authenticity In this wide ranging introduction Jonathan A C Brown explores the collection and criticism of hadith and the controversy surrounding its role in modern Islam This edition revised and updated with additional case studies and attention to the very latest scholarship also features a new chapter on how hadiths have been used politically both historically and in the Arab Spring and its aftermath Informative and accessible it is perfectly suited to students scholars and general readers interested in this critical element of Islam **Religion and Trade** Francesca Trivellato, Leor Halevi, Catia Antunes, 2014-08-20 Although trade connects distant people and regions bringing cultures closer together through the exchange of material goods and ideas it has not always led to unity and harmony From the era of the Crusades to the dawn of colonialism exploitation and violence characterized many trading ventures which required vessels and convoys to overcome tremendous technological obstacles and merchants to grapple with strange customs and manners in a foreign environment Yet despite all odds experienced traders and licensed brokers as well as ordinary people travelers pilgrims missionaries and interlopers across the globe concocted ways of bartering securing credit and establishing relationships with people who did not speak their language wore different garb and worshipped other gods Religion and Trade Cross Cultural Exchanges in World History 1000 1900 focuses on trade across religious boundaries around the Mediterranean Sea and the Atlantic and Indian Oceans during the second millennium Written by an international team of scholars the essays in this volume examine a wide range of commercial exchanges from first encounters between strangers from different continents to everyday transactions between merchants who lived in the same city yet belonged to diverse groups In order to broach the intriguing yet surprisingly neglected subject of how the relationship between trade and religion developed historically the authors consider a number of interrelated questions When and where was religion invoked explicitly as part of commercial policies How did religious norms affect the everyday conduct of trade Why did economic imperatives political goals and legal institutions help sustain commercial exchanges across religious barriers in different times and places When did trade between religious groups give way to more tolerant views of the other and when by contrast did it coexist with hostile images

of those decried as infidels Exploring captivating examples from across the world and spanning the course of the second millennium this groundbreaking volume sheds light on the political economic and juridical underpinnings of cross cultural trade as it emerged or developed at various times and places and reflects on the cultural and religious significance of the passage of strange persons and exotic objects across the many frontiers that separated humankind in medieval and early modern times **A Companion to Science, Technology, and Medicine in Ancient Greece and Rome, 2 Volume Set**
