The Warcraft Civilization William Sims

Bainbridge, 2012-09-21 A FASCINATING DEEP DIVE FOR FANS OF WoW Exploring the popular online role playing game World of Warcraft as a virtual prototype of the real human future. World of Warcraft is more than a game. There is no ultimate goal, no winning hand, no princess to be rescued. WoW is an immersive virtual world in which characters must cope in a dangerous environment, assume identities, struggle to understand and communicate, learn to use technology, and compete for dwindling resources. Beyond the fantasy and science fiction details, as many have noted, it's not entirely unlike today's world. In *The Warcraft Civilization*, sociologist William Sims Bainbridge goes further, arguing that WoW can be seen not only as an allegory of today but also as a virtual prototype of tomorrow of a real human future in which tribe-like groups will engage in combat over declining natural resources, build temporary alliances on the basis of mutual self-interest, and seek a set of values that transcend the need for war. What makes WoW an especially good place to look for insights about Western civilization, Bainbridge says, is that it bridges past and future. It is founded on Western cultural tradition yet aimed toward the virtual worlds we could create in times to come.

Virtually Sacred Robert M. Geraci, 2014-06-13 Millions of users have taken up residence in virtual worlds, and in those worlds they find opportunities to revisit and rewrite their religious lives. Robert M. Geraci argues that virtual worlds and video games have become a locus for the satisfaction of religious needs, providing many users with devoted communities, opportunities for ethical reflection, a meaningful experience.

of history and human activity and a sense of transcendence Using interviews surveys and his own first hand experience within the virtual worlds Geraci shows how World of Warcraft and Second Life provide participants with the opportunity to rethink what it means to be religious in the contemporary world Not all participants use virtual worlds for religious purposes but many online residents use them to rearrange or replace religious practice as designers and users collaborate in the production of a new spiritual marketplace Using World of Warcraft and Second Life as case studies this book shows that many residents now use virtual worlds to re imagine their traditions and work to restore them to authentic sanctity or else replace religious institutions with virtual communities that provide meaning and purpose to human life For some online residents virtual worlds are even keys to a post human future where technology can help us transcend mortal life Geraci argues that World of Warcraft and Second Life are virtually sacred because they do religious work They often do such work without regard for and frequently in conflict with traditional religious institutions and practices ultimately they participate in our sacred landscape as outsiders competitors and collaborators

Creating Second Lives Astrid Ensslin, Eben Muse, 2011-05-09 This book aims to provide insights into how second lives in the sense of virtual identities and communities are constructed textually semiotically and discursively specifically in the online environment Second Life and Massively Multiplayer Online Games such as World of Warcraft The book s philosophy is multi disciplinary and its goal is to explore the question of how we as gamers and residents of virtual worlds construct alternative online realities in a variety of ways Of particular significance to this endeavour are conceptions of the body in cyberspace and of spatiality which manifests itself in natural and built environments as well as the triad of space place and landscape The contributors disciplinary backgrounds include media communication cultural and literary studies and they examine issues of reception and production identity community gender spatiality natural and built environments using a plethora of methodological approaches ranging from theoretical and philosophical contemplation through social semiotics to corpus based discourse analysis

Battlefields of Negotiation René Glas, 2025-10-01 The massively multiplayer online role playing game World of Warcraft has become one of the most popular computer games of the past decade introducing millions around the world to community based play Within the boundaries set by its design the game encourages players to appropriate and shape the game to their own wishes resulting in highly diverse forms of play and participation This illuminating study frames World of Warcraft as a complex socio cultural phenomenon defined by and evolving as a result of the negotiations between groups of players as well as the game s owners throwing new light on complex consumer producer relationships in the increasingly participatory but still tightly controlled media of online games
