World Report Law School Rankings:

Final Report Michael Sauder, 2009 Law School Rankings, Faculty Scholarship, and Associate Deans for Faculty Research Richard Buckingham, 2008 The authors contend that a boom in law school rankings has encouraged many U S law schools to take new measures to encourage and publicize faculty scholarship The establishment of associate deans for faculty research is one such measure The authors conducted a study to determine the number of law schools that have these dean level positions They argue that many law schools have established these positions as part of their efforts to improve their standing in the increasingly important rankings The authors begin with a historical overview of the original law school model and discuss how that model evolved over time They focus on how those changes led to a competitive law school market that helped lay the groundwork for U S News amp World Report and other law school rankings They then explore numerous alternative ranking methodologies and conclude with a study of ABA accredited law schools that have appointed associate deans for faculty research The American Legal Profession Christopher P. Engines of Anxiety Wendy Nelson Espeland, Michael Sauder, Wendy Espeland, 2016-05-09 Students and the public routinely consult various published college rankings to assess the quality of colleges and universities and easily compare different schools However many institutions have responded to the rankings in ways that benefit neither the schools nor their students In *Engines of Anxiety* sociologists Wendy Espeland and Michael Sauder delve deep into the mechanisms of law school rankings which have become a top priority within legal education Based on a wealth of observational data and over 200 in depth interviews with law students university deans and other administrators they show

how the scramble for high rankings has affected the missions and practices of many law schools *Engines of Anxiety* tracks how rankings such as those published annually by the U S News World Report permeate every aspect of legal education beginning with the admissions process The authors find that prospective law students not only rely heavily on such rankings to evaluate school quality but also internalize rankings as expressions of their own abilities and flaws For example they often view rejections from first tier schools as a sign of personal failure The rankings also affect the decisions of admissions officers who try to balance admitting diverse classes with preserving the school s ranking which is dependent on factors such as the median LSAT score of the entering class Espeland and Sauder find that law schools face pressure to admit applicants with high test scores over lower scoring candidates who possess other favorable credentials *Engines of Anxiety* also reveals how rankings have influenced law schools career service departments Because graduates job placements play a major role in the rankings many institutions have shifted their career services resources toward tracking placements and away from counseling and network building In turn law firms regularly use school rankings to recruit and screen job candidates perpetuating a cycle in which highly ranked schools enjoy increasing prestige As a result the rankings create and reinforce a rigid hierarchy that penalizes lower tier schools that do not conform to the restrictive standards used in the rankings The authors show that as law schools compete to improve their rankings their programs become more homogenized and less accessible to non traditional students The ranking system is considered a valuable resource for learning about more than 200 law schools Yet *Engines of Anxiety* shows that the drive to increase a school s rankings has negative consequences for students educators and administrators and has implications for all educational programs that are quantified in similar ways

ABA Journal ,1997-03 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association Ranking Obsession Culture Sienna Vance,AI,2025-04-07 Ranking Obsession Culture examines the pervasive influence of rankings on legal education impacting student choices and institutional behavior It explores how the pursuit of higher rankings affects where students choose to attend law school and how law schools allocate resources The book uniquely combines law economics psychology and sociology to provide a multifaceted understanding of this phenomenon The book delves into the psychological impact of rankings on prospective students revealing how perceptions of prestige can drive decisions and analyzes how law schools strategically adapt admissions practices to improve their ranking position It also addresses the potential distortions caused by a singular focus on metrics such as a diminished emphasis on teaching quality The text unfolds by first introducing the history of ranking systems then examining the psychological factors driving student fixation and finally exploring the ethical implications of ranking driven behavior The book offers a critical perspective on the role of rankings in shaping decisions within the legal education market By connecting to broader themes in higher education policy organizational behavior and sociology it provides insights relevant to other professional fields This analysis challenges assumptions made by students

faculty and administrators advocating for a more holistic understanding of institutional value and the need for comprehensive assessment methods beyond just rankings

Poison Ivy Evan Mandery, 2025-03-18 Hailed as a staggering portrait of inequality in America Philip Dray *Poison Ivy* tells the bigger seedier story of how elite colleges create paths to admission available only to the wealthy despite rhetoric to the contrary In a lively and trenchant *Washington Monthly* account Evan Mandery a Harvard graduate and current professor at a public college that serves low and middle income students reveals how tacit agreements between exclusive Ivy plus schools and white affluent suburbs create widespread de facto segregation And as a college degree continues to be the surest route to upward mobility the inequality bred in our broken higher education system is now a principal driver of skyrocketing income inequality Mandery contrasts the lip service paid to opportunity by so many elite colleges and universities with schools that actually walk the walk Now in an accessible paperback format *Poison Ivy* is a no holds barred takedown *Forbes* that synthesizes fascinating insider information on everything from how students are evaluated unfair tax breaks and questionable fundraising practices to suburban rituals testing tutoring tuition schemes and more This bold provocative indictment of America's elite colleges shows us exactly what's at stake and what will be possible if we muster the collective will to transform it
