

If Prometheus was worthy of the wrath of
heaven for kindling the first fire upon earth, how
ought all the gods honor the men who make it
their professional business to put it out?

What Makes Life Worth Living Bernard Stiegler, 2013-11-18

In the aftermath of the First World War, the poet Paul Valéry wrote of a crisis of spirit brought about by the instrumentalization of knowledge and the destructive subordination of culture to profit. Recent events demonstrate all too clearly that the stock of mind or spirit continues to fall. The economy is toxically organized around the pursuit of short-term gain, supported by an infantilizing, dumbed-down media. Advertising technologies make relentless demands on our attention, reducing us to idiotic beasts no longer capable of living. Spiralling rates of mental illness show that the fragile life of the mind is at breaking point. Underlying these multiple symptoms is consumer capitalism, which systematically immiserates those whom it purports to liberate. Returning to Marx's theory, Stiegler argues that consumerism marks a new stage in the history of proletarianization. It is no longer just labour that is exploited, pushed below the limits of subsistence, but the desire that is characteristic of human spirit. The cure to this malaise is to be found in what Stiegler calls a pharmacology of the spirit. Here, pharmacology has nothing to do with the chemical supplements developed by the pharmaceutical industry. The *pharmakon*, defined as both cure and poison, refers to the technical objects through which we open ourselves to new futures and thereby create the spirit that makes us human. By reference to a range of figures from Socrates, Simondon, and Derrida to the child psychoanalyst Donald Winnicott, Stiegler shows that technics are both the cause of our suffering and also what makes life worth living.

Main Currents in Nineteenth Century Literature - 4. Naturalism in England Georg Brandes, 2022-06-02

In *Main Currents in Nineteenth Century Literature*, 4. Naturalism in England, Georg Brandes delves into the intricacies of Naturalism as a literary movement that defined an epoch in English literature. Employing a critical yet accessible style, Brandes navigates through the era's socio-political landscape, illuminating how writers such as Thomas Hardy and George Gissing mirrored the deterministic perspectives of their time. This exploration not only outlines the philosophical underpinnings of Naturalism but also critiques its stylistic traits, emphasizing an objective narrative voice that distills the essence of reality through the lens of scientific thought. Georg Brandes, a pioneering Danish critic and public intellectual, played a significant role in shaping modern literary criticism. Influenced by the tumultuous cultural shifts of the late 19th century and the rise of Realism across Europe, Brandes sought to champion authors whose works reflected a deeper understanding of human psychology and social conditions. His extensive readings and personal interactions with key literary figures contributed to his profound insights into Naturalism and its

impact on English literature This book is essential for scholars and enthusiasts eager to grasp the complexities of Naturalism in a pivotal period of literary development By engaging with Brandes s thorough analysis readers will not only appreciate the works of major writers but also attain a nuanced understanding of the cultural currents that shaped their narratives
