Fort St. Joseph Revealed Michael S. Nassaney, 2021-10-04 Fort St Joseph Revealed is the first synthesis of archaeological and documentary data on one of the most important French colonial outposts in the western Great Lakes region Located in what is now Michigan Fort

St Joseph was home to a flourishing fur trade society from the 1680s to 1781. Material evidence of the site lost for centuries was discovered in 1998 by volume editor Michael Nassaney and his colleagues who summarize their extensive excavations at the fort and surrounding areas in these essays. Contributors analyze material remains including animal bones, lead seals, smudge pits and various other detritus from daily life to reconstruct the foodways, architectural traditions, crafts, trade and hide processing methods of the fur trade. They discuss the complex relationship between the French traders and local Native populations who relied on each other for survival and forged links across their communities through intermarriage and exchange even as they maintained their own cultural identities. Faunal remains excavated at the site indicate the French quickly adopted Native cuisine as they were unable to transport perishable goods across long distances. Copper kettles and other imported objects from Europe were transformed by Native Americans into decorative ornaments such as tinkling cones and French textiles served as a medium of stylistic expression in the multi-ethnic community that developed at Fort St Joseph. Featuring a thought-provoking look at the award-winning public archaeology program at the site, this volume will inspire researchers with the potential of community-based service learning initiatives to tap into the analytical power at the interface of history and archaeology. Winterton's book is a good introductory effort on the haptic environment of World War I aviators and their personal artifacts. The Journal of the Air Force Historical Foundation Archaeology provides a fascinating insight into the lives of the aviators of the First World War. Their descriptions of the sensation of flying in the open cockpits of the primitive warplanes of the day and the artifacts that have survived from these first years of aerial combat give us a powerful sense of what their wartime service was like and chart the beginning of our modern understanding of aviation. But the subject hasn't been explored in any depth before which is why Melanie Winterton's pioneering book is so timely. Hers is the first study of the trench art, souvenirs and lucky mascots associated with the Royal Flying Corps which in an original way tell us so much about the experience of flying on the Western Front a century ago. Extensive quotations from the memoirs of these early airmen are combined with an analysis of the artifacts themselves. They convey something of the fear and anxiety the airmen had to grapple with on a daily basis and bring out the full significance of the poignant souvenirs they left behind. Pieces of crashed aeroplane, wooden propellers, strips of linen, fragments of metal were recycled and circulated during the war and afterwards became the focus of attention in the domestic home. As Melanie Winterton demonstrates, these items connected the living with the deceased which is why they are so strongly evocative even today. Material Worlds Barbara J. Heath, Eleanor E. Breen, Lori A. Lee, 2017-02-17. *Material Worlds* examines consumption from an archaeological perspective, broadly exploring the intersection of social relations and objects through the processes of production, distribution, use, reuse and discard.

Interrogating individual objects as well as considering the contexts in which acts of consumption take place a range of case studies present the intertwined issues of power inequality identity and community as mediated through choice access and use of the diversity of mass produced goods Key themes of this innovative volume include the relationship between colonial political and economic structures and the practices of consumption the use of consumer goods in the construction and negotiation of identity and the dialectic between strategies of consumption and individual or community choices Situating studies of consumerism within the field of historical archaeology this exciting collection reflects on the interrelationship between the material and ideological aspects of culture With a focus on North America from the seventeenth through the early twentieth centuries *Material Worlds* is an important examination of consumption which will appeal to scholars with interests in colonialism gender and race as well as those engaged with the material culture of the emergent modern world
