The Mysteries Of The Marco Polo Maps:

The Mysteries of the Marco Polo Maps Benjamin B. Olshin, 2014-10-29 Concerns a collection of maps and associated documents claimed to be from Marco Polo's time or that of his daughters as many of the maps have the name or one or another of the three daughters on them Discusses provenance authenticity and history of the documents known to scholars as the Marco Polo Maps since 1948 here discussed fully for the first time

The Mysteries of the Marco Polo Maps Benjamin B. Olshin, 2014-10-29 What's the truth behind the travels of Marco Polo A fascinating tale about maps history and exploration Times Literary Supplement UK In the thirteenth century Italian merchant and explorer Marco Polo traveled from Venice to the far reaches of Asia a journey he chronicled in a narrative titled *Il Milione* later known as *The Travels of Marco Polo* While Polo's writings would go on to inspire the likes of Christopher Columbus scholars have long debated their veracity Some have argued that Polo never even reached China while others believe that he came as far as the Americas Now there's new evidence for this historical puzzle a very curious collection of fourteen little known maps and related documents said to have belonged to the family of Marco Polo himself Here historian of cartography Benjamin B Olshin offers the first credible book length analysis of these artifacts charting their course from obscure origins in the private collection of Italian American immigrant Marcian Rossi in the 1930s to investigations of their authenticity by the Library of Congress J Edgar Hoover and the FBI to the work of the late cartographic scholar Leo Bagrow to Olshin's own efforts to track down and study the Rossi maps all but one of which are in the possession of Rossi's great grandson Are the maps forgeries facsimiles or modernized copies Did Marco Polo's daughters whose names appear on several of the artifacts preserve in them geographic information about Asia first recorded by their father Or did they inherit maps created by him Did Marco Polo entrust the maps to an admiral with links to Rossi's family line Or if the maps have no connection to Marco Polo who made them when and why Regardless of the maps provenance this tale takes us on a fascinating journey offering insights into Italian history the age of exploration and the wonders of cartography Olshin's book tugs powerfully at the imagination of anybody interested in the Polo story medieval history old maps geographical ideas European voyages of discovery and early Chinese legends *The Wall Street Journal*

[Mapping Paradigms in Modern and Contemporary Art](#) Simonetta Moro, 2021-07-29 Mapping Paradigms in Modern and Contemporary Art defines a new cartographic aesthetic or what Simonetta Moro calls *carto aesthetics* as a key to interpreting specific phenomena in modern and contemporary art through the concept of poetic cartography The problem of mapping although indebted to the spatial turn of poststructuralist philosophy is reconstructed as hermeneutics while exposing the nexus between topology space time and memory The book posits that the emergence of mapping as a ubiquitous theme in contemporary art can be attributed to the power of the cartographic model to constitute multiple worldviews that can be seen as paradigmatic of the post modern and contemporary condition This book will be of particular interest to scholars in art history art theory aesthetics and cartography

Cartography between Christian Europe and the

Arabic-Islamic World, 1100-1500 ,2021-06-17 Medieval Christian European and Arabic Islamic cultures are both notable for the wealth and diversity of their geographical literature yet to date there has been relatively little attempt to compare medieval Christian and Islamic mapping traditions in a detailed manner Cartography between Christian Europe and the Arabic Islamic World offers a timely assessment of the level of interaction between the two traditions across a range of map genres including world and regional maps maps of the seven climes and celestial cartography Through a mixture of synthesis and case study the volume makes the case for significant but limited cultural transfer Contributors are Elly Dekker Jean Charles Duc ne Alfred Hiatt Yossef Rapoport Stefan Schr der Emmanuelle Vagnon *Commander Francis Drake & the West Coast Mysteries* Gunnar Thompson,2010-09-01 Discovery of Drake s lost navigational chart finally reveals secrets behind his voyage to America s West Coast in 1579 The secret location of Drake s colony New Albion is finally identified This was the first British colony in America and it marks the beginning of the British Empire At last we know the reason for an ongoing feud between Queen Elizabeth and Sir Francis He wanted desperately to rescue the shipmates that he left behind in New Albion Drake used a shipboard clock to map the West Coast This is the first map of America that was made using a chronometer thus Drake s map is accurate to within 15 degrees of the true longitude Drake was not just a pirate as most historians assume He was a naturalist ethnographer and geographer Drake s map and his new ship design opened the way for the Dutch East India Company The Da Vinci Globe Stefaan Missinne,2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds a distinct globe with mysterious images such as old ships sailors a volcano a hybrid monster pentimenti waving patterns conic individualised mountains curving rivers vigorous coastal lines chiaroscuro and an unresolved triangular anagram which remains an enigma The globe is hand engraved in great detail on ostrich egg shells from Pavia by a left handed Renaissance genius of unquestionable quality It shows secret knowledge of the map world from the time of Columbus Cabral Amerigo Vespucci and Leonardo da Vinci Central and North America are covered by a vast ocean The da Vinci globe originates from Florence and dates from 1504 It marks the first time ever that the names of countries such as Brazil Germania Arabia and Judea have appeared on a globe A Leonardo drawing for this globe showing the coast of the New World and Africa has been discovered in the British Library This book brings the reader through a fabulous journey of scholars maps riddles rebuses iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe It details 500 years of mystery fine scholarship and expert forensic testing at numerous material science laboratories the world over The da Vinci globe now takes its rightful place surpassing the Lenox globe its copper cast identical twin as the most mysterious globe of our time As such this monograph is an essential text in Leonardo studies and in the history of cartography **Topos in Utopia: A peregrination to early modern utopianism's space** Sotirios Triantafyllos,2021-09-07 Topos in Utopia examines early modern literary utopias and intentional communities social and cultural conception of space Starting from Thomas More s

seminal work published in 1516 and covering a period of three centuries until the emergence of Enlightenment's euchronia this work provides a thorough yet concise examination of the way space was imagined and utilised in the early modern visions of a better society Dealing with an aspect usually ignored by the scholars of early modern utopianism this book asks us to consider if utopias imaginary lands are based not only on abstract ideas but also on concrete spaces Shedding new light on a period where reformation zeal humanism's optimism colonialism's greed and a proto scientific discourse were combined to produce a series of alternative social and political paradigms this work transports us from the shores of America to the search for the Terra Australis Incognita and the desire to find a new and better world for us **Mapping Christopher**

Columbus Al M. Rocca, 2023-02-20 The impact of Christopher Columbus's first transatlantic voyage launched an unprecedented explosion of European exploration Throughout the last 500 years scholars have recognized this transforming event and they have written extensively on the subject To date no American author has dedicated a book to Columbus's life before 1492 This biography does so with a focus on geographical experiences that affected his formulation of a transatlantic concept Incorporating extensive research from American and European scholars historians geographers anthropologists and cartographers the author proposes that Columbus systematically built a transatlantic voyage proposal from knowledge gained on previous voyages in the Mediterranean Sea and Eastern Atlantic Ocean The book's extensive use of maps place Columbus's actions on specific land and ocean locations Persons interested in gleaning more information about Columbus's maritime background will find a plethora of maps to visualize the extent of his early travels **Ancient Ocean Crossings**

Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive

multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

Strange matter Martin Bleisteiner, Jan-Peer Hartmann, Andrew James Johnston, 2025-09-02 Strange matter offers exciting new perspectives on the premodern fascination with materiality and the various ways in which the Middle Ages and subsequent periods experienced things in time Drawing on a wide selection of examples that range from medieval texts and artefacts of both European and non European origin to Macbeth's highly evocative meditation on bubbles the essays compiled in this volume look beyond the confines of the Anglophone world As they engage critically with the specific temporal otherness modernity has so often ascribed to medieval texts and artefacts the contributors also enter into productive dialogue with recent trends in criticism such as thing studies and the growing field of object biographies in cultural studies and museology

When Maps Become the World Rasmus Grønfeldt Winther, 2020-06-29 Map making and ultimately map thinking is ubiquitous across literature cosmology mathematics psychology and genetics We partition summarize organize and clarify our world via spatialized representations Our maps and more generally our representations seduce and persuade they build and destroy They are the ultimate record of empires and of our evolving comprehension of our world This book is about the promises and perils of map thinking Maps are purpose driven abstractions discarding detail to highlight only particular features of a territory By preserving certain features at the expense of others they can be used to reinforce a privileged position When Maps Become the World shows us how the scientific theories models and concepts we use to intervene in the world function as maps and explores the consequences of this both good and bad We increasingly understand the world around us in terms of models to the extent that we often take the models for reality Winther explains how in time our historical representations in science in cartography and in our stories about ourselves replace individual memories and become dominant social narratives they become reality and they can remake the world

Secret Voyages to the New World Gunnar Thompson, 2010 The best introduction to multiethnic New World Discovery before Columbus Nine true adventures featuring Hatshepsut King Solomon Xu Fu Marco Polo Nicholas of Lynn Zheng He Martin Behaim Amerigo Vespucci King Arthur Queen Elizabeth and Francis Drake Includes first maize Indian corn in Egypt early maps of America before Columbus Roman Florida Albertin di Virga's 1414 map of Peru and North America ancient artifacts and faces of Old World voyagers in Mexico and Peru and Francis Drake's amazing clock map Excellent coffee table book great for adults and young readers Beautifully illustrated excellent index and bibliography A fun read that is also packed with new information about secret voyages forbidden lands and enigmas the pros have missed

Thomas Gwyn Elger,2019-12-17 In The Moon A Full Description and Map of its Principal Physical Features Thomas Gwyn Elger presents a comprehensive exploration of lunar topography meticulously detailing the Moon s principal formations through both text and detailed cartographic illustrations Elger s literary style is marked by a meticulous attention to detail and scientific rigor reflecting the spirit of 19th century astronomical inquiry The book is placed within the context of a burgeoning interest in lunar observation during the Victorian era when advances in telescopic technology allowed for unprecedented exploration of the Moon s surface bridging the gap between poetry and scientific observation within the Romantic tradition Elger an esteemed British astronomer and selenographer drew upon his extensive knowledge and personal experiences with telescopic observation contributing significantly to the field of lunar studies His background in astronomy and geology coupled with a passionate commitment to disseminating scientific knowledge propelled his desire to create a work that was simultaneously accessible to lay readers and rigorously informative for scholars This passion for public education in astronomy exemplifies Elger s belief in the importance of popular science Set against the backdrop of an era of astronomical discovery Elger s work is an essential read for both enthusiasts and scholars alike It not only serves as a historical document reflecting the scientific thinking of its time but also provides invaluable insights into the Moon s geological features making it a must have for anyone with a deepened interest in lunar studies or the history of astronomy In this enriched edition we have carefully created added value for your reading experience A succinct Introduction situates the work s timeless appeal and themes The Synopsis outlines the central plot highlighting key developments without spoiling critical twists A detailed Historical Context immerses you in the era s events and influences that shaped the writing A thorough Analysis dissects symbols motifs and character arcs to unearth underlying meanings Reflection questions prompt you to engage personally with the work s messages connecting them to modern life Hand picked Memorable Quotes shine a spotlight on moments of literary brilliance Interactive footnotes clarify unusual references historical allusions and archaic phrases for an effortless more informed read **End Times to 2019** David Montaigne,2013-01-09 Does the end of the Mayan Calendar start the countdown to Judgment Day Biblical and historical researcher David Montaigne concludes that this is the case He says that the end of the Mayan Long Count is the official start of the Bible s seven year tribulation both were

focused on the same astronomical events that occur from 2012 to 2019 The world as we know it will be gone by 2020 Texts from ancient India tell us about great cycles of destruction The Egyptians told the same basic story with different names The Maya reveal another version of the story and were very clear about the timing of events from December 2012 to 2019 Your average American is no expert on these cultures but most people do have a Bible at home and the clearest details on what is about to happen can be found in the Bible if you don't let someone else tell you which parts you should focus on No this isn't what you were taught in Sunday school Religious leaders guide us between the raindrops of curious comments in the Bible We are discouraged from focusing on the parts they say we weren't meant to understand But if we stop glossing over these important passages we will understand a flood of details about the End Times Our leaders are not ignorant of these events The elite already know what is about to happen and they have made preparations most rational people would not believe because evidence is suppressed to avoid chaos They want us to remain ignorant or at least to believe that the details are secrets that cannot be known But the coming events and their timing are not secrets Years ago this book's publication would not have been tolerated by those in power But by now it doesn't matter much their plans are not going to be interfered with at this point Your plans however can still be formulated if you make the choice to understand Topics include Bible Prophecy Matthew 24 36 Knowing the hour and the day The Mayan Calendar and Mythology Pole Shifts Galactic Superwaves Ancient Egypt Ancient India World Mythology The Georgia Guidestones The real Star of Bethlehem and the exact birthday of Christ Calculating the Second Coming and Judgment Day more
