Bensalem represent the ideal qualities which Bacon the statesman desired rather than hoped to see characteristic of his own country and in Solomon s House we have Bacon the scientist indulging without restriction his prophetic vision of the future of human knowledge No reader acquainted in any degree with the processes and results of modern scientific inquiry can fail to be struck by the numerous approximations made by Bacon s imagination to the actual achievements of modern times The plan and organization of his great college lay down the main lines of the modern research university and both in pure and applied science he anticipates a strikingly large number of recent inventions and discoveries In still another way is The New Atlantis typical of Bacon s attitude In spite of the enthusiastic and broad minded schemes he laid down for the pursuit of truth Bacon always had an eye to utility The advancement of science which he sought was conceived by him as a means to a practical end the increase of man s control over nature and the comfort and convenience of humanity For pure metaphysics or any form of abstract thinking that yielded no fruit he had little interest and this leaning to the useful is shown in the practical applications of the discoveries made by the scholars of Solomon s House Nor does the interest of the work stop here It contains much both in its political and in its scientific ideals that we have as yet by no means achieved but which contain valuable elements of suggestion and stimulus for the future

Ingram, 2013-10-18 *Idioms of Self Interest* uncovers an emerging social integration of economic self interest in early modern England by examining literary representations of credit relationships in which individuals are both held to standards of communal trust and rewarded for risk taking enterprise Drawing on women s wills merchants tracts property law mock testaments mercantilist pamphlets and theatrical account books and utilizing the latest work in economic theory and history the book examines the history of economic thought as the history of discourse In chapters that focus on *The Merchant of Venice* *Eastward Ho* and *Whitney s Wyll and Testament* it finds linguistic and generic stress placed on an ethics of credit that allows for self interest Authors also register this stress as the failure of economic systems that deny self interest as in the overwrought paternalistic systems depicted in Shakespeare s *Timon of Athens* and Francis Bacon s *New Atlantis* The book demonstrates that Renaissance interpretive formations concerning economic behaviour were more flexible and innovative than appears at first glance and it argues that the notion of self interest is a coherent locus of interpretation in the early seventeenth century *The Rosicrucian Enlightenment* Frances Yates, 2003-09-02 First Published in 1986 Routledge is an imprint of Taylor Francis an informa company
