Education and Its Discontents Mark Moss,2012 Education and Its Discontents Teaching the Humanities and the Importance of a Liberal Education in the Age of Mass Information by Mark Moss is an exploration of how the traditional educational environment particularly in the post secondary world is changing as a consequence of the influx of new technology Students come to the classroom or lecture hall expecting to have their habits and tastes gleaned from the online world replicated in an Educational environment Faculty who do not adapt face enormous obstacles and faculty that do adapt run the risk of eroding the integrity of what they have been trained to teach Students now have access to myriad of technologies that instead of supplementing the educational process have actually taken it over Issues that run from plagiarism to the erosion of the humanities are now rampant concerns in the post secondary world Behavior issues YouTube videos cell phones and the incessant clicking of the computer keys are just a few of the technologies altering the educational landscape Moss discusses that it is now not only how we learn but what we continue to teach and how that enormously important legacy is protected Education and Its Discontents Teaching the Humanities and the Importance of a Liberal Education in the Age of Mass Information by Mark Moss argues that education has changed and the supremacy of the book and the lecture is now open for debate What has been gained over the last five hundred years is now susceptible to the vagaries of technology which compel us to question their continuing relevance

Independent School Libraries Dorcas Hand,2010-06-11 The first book published about independent school libraries since 1985 this work offers both the independent school library community and the broader school library community a wealth of insights into excellence in library practice Independent School Libraries Perspectives on Excellence offers readers insights into best practices in library services for school communities using examples drawn from independent schools of various sizes descriptions and locations across the United States Two overview essays introduce a statistical analysis of independent schools Each of the remaining essays provides perspective on a different aspect of library practice including staffing advocacy assessment technology collaboration programs beyond the curriculum intellectual freedom and privacy budgeting accreditation disaster planning and more Because independent school librarians work across divisions and without a mandate to adhere to state or national standards they have the freedom to explore and refine best practice in a school library setting Fortunately the ideas and methods they have developed many of which are on display here can be applied in any school library

The Dumbest Generation Mark Bauerlein,2008-05-15 This shocking surprisingly entertaining romp into the intellectual nether regions of today s underthirty set reveals the disturbing and ultimately incontrovertible truth cyberculture is turning us into a society of

know nothings The Dumbest Generation is a dire report on the intellectual life of young adults and a timely warning of its impact on American democracy and culture For decades concern has been brewing about the dumbed down popular culture available to young people and the impact it has on their futures But at the dawn of the digital age many thought they saw an answer the internet email blogs and interactive and hyper realistic video games promised to yield a generation of sharper more aware and intellectually sophisticated children The terms information superhighway and knowledge economy entered the lexicon and we assumed that teens would use their knowledge and understanding of technology to set themselves apart as the vanguards of this new digital era That was the promise But the enlightenment didn t happen The technology that was supposed to make young adults more aware diversify their tastes and improve their verbal skills has had the opposite effect According to recent reports from the National Endowment for the Arts most young people in the United States do not read literature visit museums or vote They cannot explain basic scientific methods recount basic American history name their local political representatives or locate Iraq or Israel on a map The Dumbest Generation How the Digital Age Stupefies Young Americans and Jeopardizes Our Future is a startling examination of the intellectual life of young adults and a timely warning of its impact on American culture and democracy Over the last few decades how we view adolescence itself has changed growing from a pitstop on the road to adulthood to its own space in society wholly separate from adult life This change in adolescent culture has gone hand in hand with an insidious infantilization of our culture at large as adolescents continue to disengage from the adult world they have built their own acquiring more spending money steering classrooms and culture towards their own needs and interests and now using the technology once promoted as the greatest hope for their futures to indulge in diversions from MySpace to multiplayer video games 24 7 Can a nation continue to enjoy political and economic predominance if its citizens refuse to grow up Drawing upon exhaustive research personal anecdotes and historical and social analysis The Dumbest Generation presents a portrait of the young American mind at this critical juncture and lays out a compelling vision of how we might address its deficiencies The Dumbest Generation pulls no punches as it reveals the true cost of the digital age and our last chance to fix it [Parenting to a Degree](#) Laura T. Hamilton, 2016-04-29 Helicopter parents the kind that continue to hover even in college are one of the most ridiculed figures of twenty first century parenting criticized for creating entitled young adults who boomerang back home But do involved parents really damage their children and burden universities In this book sociologist Laura T Hamilton illuminates the lives of young women and their families to ask just what role parents play during the crucial college years Hamilton vividly captures the parenting approaches of mothers and fathers from all walks of life from a CFO for a Fortune 500 company to a waitress at a roadside diner As she shows parents are guided by different visions of the ideal college experience built around classed notions of women s work family plans and the ideal age to grow up Some are intensively involved and hold adulthood at bay to cultivate specific traits professional helicopters for instance help develop the skills and credentials that will advance their daughters careers while

pink helicopters emphasize appearance charm and social ties in the hopes that women will secure a wealthy mate In sharp contrast bystander parents whose influence is often limited by economic concerns are relegated to the sidelines of their daughter's lives Finally paramedic parents who can come from a wide range of class backgrounds sit in the middle intervening in emergencies but otherwise valuing self sufficiency above all Analyzing the effects of each of these approaches with clarity and depth Hamilton ultimately argues that successfully navigating many colleges and universities without involved parents is nearly impossible and that schools themselves are increasingly dependent on active parents for a wide array of tasks with intended and unintended consequences Altogether Parenting to a Degree offers an incisive look into the new and sometimes problematic relationship between students parents and universities
