## **The Oxford Companion To The Economics Of China:**

**The Oxford Companion to the Economics of China** Shenggen Fan, Ravi Kanbur, Shang-Jin Wei, Xiaobo Zhang, 2014-10-30 China's rise as an economic powerhouse raises a number of questions that are the subject of lively debate. How did the country do it? How applicable are the lessons of China's economic reform of the past thirty years to the challenges it faces in the next three decades? What does the detailed pattern of China's success and challenges look like at the sub-sectoral and sub-national levels and what does this mean for future policy? How will China's role as a global economic player evolve? The Oxford Companion to the Economics of China presents an original collection of perspectives on the Chinese economy's past, present and future. 99 entries written by the leading China analysts of our time. The topics covered include the China model, future prospects for China, China and the global economy, trade and the Chinese economy, macroeconomics and finance, urbanisation, industry and markets, agriculture and rural development, land, infrastructure and environment, population and labour, dimensions of wellbeing and inequality, health and education, gender equity, regional divergence in China and a selection of perspectives on some of China's provinces. The Editors are four global leaders in Chinese economic analysis and policy who between them have held or hold the following positions: Director General, International Food Policy Research Institute; Co-Editor, China Economic Review; President, Chinese Economists Society; Assistant Director of Research at the IMF; Principal Adviser to the Chief Economist of the World Bank and Professors of Economics at Ivy League Universities.

A Modern Guide to the Economics of Happiness Luigino Bruni, Alessandra Smerilli, Dalila De Rosa, 2021-01-29 Exploring the modern approach to the economics of happiness which came about with the Easterlin Paradox, this book analyses and assesses the idea that as a country gets richer the happiness of its citizens remains the same. The book moves through three distinct pillars of study in the field: first analysing the historical and philosophical foundations of the debate, then the methodological and measurements issues and their political implications, and finally empirical applications and discussion about what determines a happy life.

The Handbook of China's Financial System Marlene Amstad, Guofeng Sun, Wei Xiong, Darrell Duffie, 2020-11-17 The Chinese economy is now easily one of the most important and closely scrutinized economies in the world. Relatively minuscule changes in predictions of how the Chinese economy will perform can drive up or down stocks and the price of oil and other commodities. At the heart of how the Chinese economy works is its financial system, but the Chinese financial system is vastly different than most people in the West can understand. How do house prices work, for example, in a country where the very concept of property ownership is significantly different than our own? This edited volume will serve as a standard reference guide to China's financial system. With eighteen chapters, the handbook features overviews on the banking sector, the core of China's financial system and the key channel for implementing China's monetary policy, China's ongoing reforms and the quickly growing bond and money markets, among other topics. Each chapter is written by a leading expert in the field and as a whole the list of contributors represents an impressive mix of leading scholars and

high level policy officials some with first hand knowledge of setting and carrying out Chinese financial policy The handbook will serve as the first real authoritative volume of literature in the field and will shed extensive new light on the links between China s financial system and the real economy **The Evolution of China's Political Economy** Rich Marino,2023-05-01

For years China s rapid economic transformation was hailed as a successful project that lifted hundreds of millions of people out of poverty However in recent times the Chinese narrative has taken a more negative turn in the eyes of the West Much of this has to do with the US perception about the role of the Chinese state in its economy and its military build up especially in the South China Sea There s no question China s complex economy can be difficult to understand Information is often unclear and incomplete and its data are not always reliable However this book presents the reader with a clear picture of China s economy and how it compares to other advanced economies mainly the United States The book unwraps the key features and structures of China s economy Moreover it examines and shows the similarities and differences in comparison with other like economies In that effort it underscores the differences by evaluating their benefits as well as their disadvantages against the backdrop of China s incomplete transition to a market economy This along with its governance structure becomes the crucial components shaping the way key stakeholders will act and react to opportunities and incentives as that economy evolves The book supplements the definition of globalization for the academic the student the professional and anyone else interested in its positive and negative effects It is also a good fit for anyone who wants to understand China s three elements of political economy global trade political power and its image on the global stage

*Economic Policy of the People's Republic of China* Barbara Darimont,2023-01-01 This book deals with the current economic policy of the People s Republic of China In addition to a brief overview of economic history since its founding and discussions of economic models an overview of both the forms of business and the Chinese labor market is provided The book pays particular attention to the development of China s e commerce sector Equally significant are China s environmental issues against the backdrop of the climate crisis Without innovations for example in energy production and waste management the Chinese economy will hardly be able to continue growing Therefore one focus of the book is on economic policy in the environmental sector Finally foreign policy including the Silk Road Initiative is examined The aim of this book is to highlight the above developments It is aimed at laypersons involved in the business of China as well as first year students who want an overview of economic policy institutions and current developments **Improving Procedural Justice in**

**Anti-Dumping Investigations** Abdulkadir Yilmazcan,2024-05-16 Provides empirical insights from the exporters WTO legal experts and government officials who dealt with anti dumping investigations *The Industrial Policy Revolution I* Justin Lin Yifu,2013-12-16 This volume is the result of the 2012 International Economic Association s series of roundtables on the theme of Industrial Policy The first New Thinking on Industrial Policy was hosted by the World Bank in Washington D C and the second New Thinking on Industrial Policy Implications for Africa was held in Pretoria South Africa *A Sense of*

*Inequality* Wendy Bottero, 2019-11-12 We have a detailed picture of how inequality impacts people's lives but a much weaker sense of how people perceive, interpret and understand issues of inequality. What shapes people's everyday understandings of inequality? How are understandings of inequality located in everyday concerns, moral values and principles of justice? This book considers what provokes everyday views or framings of inequality. It examines how different approaches can help us understand this process, drawing on a range of literatures including social attitudes and perceptions research, class identities and neoliberalism theories of the psychosocial affect and the abject, social constructionism, social movements research and pragmatism. The book examines how troubling social situations come to be regarded as inequalities, explores how they come to be understood as class, gender, racial or other kinds of inequality and considers how such inequalities come to be seen as susceptible to intervention and change.

**The Economics of China** Shenggen Fan, Ravi Kanbur, Shang-Jin Wei, Xiaobo Zhang, 2013 This paper is the first chapter in the Oxford Companion to the Economics of China Oxford University Press forthcoming. Rather than trying to summarize other contributors' views, we provide our own perspectives on the Economics of China: the past experience and the future prospects. Our reading of China's economic development over the past 35 years raises two major sets of issues, one of which is inward looking and the other of which is outward looking. While Chinese aggregate development is impressive, it has raised the question of whether the growth is sustainable and has led to a set of distributional issues and well-being concerns. We argue that these internal issues combine with those raised by China's rapid integration and ever-growing presence in the international arena to jointly frame the challenges faced by China in the next 35 years as it approaches the 100th anniversary of the People's Republic in 2049.

**Research Handbook on Soft Law** Mariolina Eliantonio, Emilia Korkea-aho, Ulrika Mörtz, 2023-11-03 This pioneering Research Handbook provides an in-depth scholarly overview of the field of soft law, exploring the scope of current thinking in the field as well as proposing future pathways for soft law research. Through theoretical and empirical analyses by established voices in the field, the Research Handbook offers important insights and much-needed clarity into the dynamic and complex nature of soft law. This title contains one or more Open Access chapters.

**Gender, Migration, and the Work of Care** Sonya Michel, Ito Peng, 2017-08-21 This book explores how around the world women's increased presence in the labor force has reorganized the division of labor in households, affecting different regions depending on their cultures, economies and politics, as well as the nature and size of their welfare states and the gendering of employment opportunities. As one result, the authors find women are increasingly migrating from the global south to become care workers in the global north. This volume focuses on changing patterns of family and gender relations, migration and care work in the countries surrounding the Pacific Rim, a global epicenter of transnational care migration. Using a multi-scalar approach that addresses micro, meso and macro levels, chapters examine three domains: care provisioning, the supply of and demand for care work, and the shaping and framing of care. The analysis reveals that multiple forms of global inequalities are now playing out in the most intimate of spaces.

The

Diffusion of Western Economic Ideas in East Asia Malcolm Warner, 2016-12-19 This book examines the diffusion of economic ideas in East Asia assessing the impact of external ideas on internal theory and practice It considers economists from Adam Smith onwards including Marx Keynes Hayek and contemporary economists and covers the subject both historically and also includes present day and likely future developments The book covers all the major countries of East Asia and pays particular attention to specific economists who have had a strong impact in specific countries and to important developments in economic theory in East Asia exploring how far these have been driven by Western economic ideas This book will be welcomed by students and scholars of East Asia and South east Asia as well as those interested in economics economic history and management

what has been achieved as a result of the economic reform programs and to draw out the key lessons that have been learned by the model of growth and development in China over the preceding four decades This book explores what has happened in the transformation of the Chinese economy in the past 40 years for China itself as well as for the rest of the world and discusses the implications of what will happen next in the context of China's new reform agenda Focusing on the long term development strategy amid various old and new challenges that face the economy this book sets the scene for what the world can expect in China's fifth decade of reform and development A key feature of this book is its comprehensive coverage of the key issues involved in China's economic reform and development Included are discussions of China's 40 years of reform and development in a global perspective the political economy of economic transformation the progress of marketisation and changes in market compatible institutions the reform program for state owned enterprises the financial sector and fiscal system reform and its foreign exchange system reform the progress and challenges in economic rebalancing and the continuing process of China's global integration This book further documents and analyses the development experiences including China's large scale of migration and urbanisation the demographic structural changes the private sector development income distribution land reform and regional development agricultural development and energy and climate change policies

**The Geoeconomics and Geopolitics of Chinese Development and Investment in Asia** Emily T. Yeh, 2018-12-07 The recent launching of China's high profile Belt and Road Initiative and its founding of the Asian Infrastructure Investment Bank have underscored China's rapidly growing importance as a global player in development diplomacy and economic governance To date scholarship on China abroad has focused primarily on Africa and Latin America In comparison China's investment and development assistance among its neighbors in Asia have been understudied despite the fact that China's aid and overseas investment remain concentrated in Asia the countries of which have had complex and often fraught cultural and political relationships with China for more than a millennia Through case studies from Southeast Asia South Asia and Central Asia this volume provides a targeted examination of the intertwined geoeconomics and geopolitics of China's investment and development in Asia It provides in depth and grounded analyses of nationalisms and state making projects as well as the material effects of China's going out strategy on livelihoods economies and politics The volume contributes to understandings of what characterizes Chinese development and pays attention to questions of elite agency capitalist dynamics state sovereignty the politics of identity and the reconfiguration of the Chinese state The chapters in this article originally appeared in a special issue of Eurasian Geography and Economics

**Economic Policy Making In China (1949-2016)** Pieter Bottelier, 2018-04-09 This book explores the key ideas and the key people who were responsible for the development of China's economy from 1949 through 2016 It discusses how economic policy evolved how economic policy was formulated and how the role of economists in decision making evolved It considers the interplay between ideological and practical questions provides biographical details of key economists and includes a clear annotated chronology of events The

book is especially valuable because the author as a senior World Bank official was a close observer of the situation and to some extent a key participant

**How China Escaped Shock Therapy** Isabella M. Weber, 2021-05-26 China has become deeply integrated into the world economy Yet gradual marketization has facilitated the country's rise without leading to its wholesale assimilation to global neoliberalism This book uncovers the fierce contest about economic reforms that shaped China's path In the first post Mao decade China's reformers were sharply divided They agreed that China had to reform its economic system and move toward more marketization but struggled over how to go about it Should China destroy the core of the socialist system through shock therapy or should it use the institutions of the planned economy as market creators With hindsight the historical record proves the high stakes behind the question China embarked on an economic expansion commonly described as unprecedented in scope and pace whereas Russia's economy collapsed under shock therapy Based on extensive research including interviews with key Chinese and international participants and World Bank officials as well as insights gleaned from unpublished documents the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization Beyond shedding light on the crossroads of the 1980s it reveals the intellectual foundations of state market relations in reform era China through a *longue durée* lens Overall the book delivers an original perspective on China's economic model and its continuing contestations from within and from without

YSEC Yearbook of Socio-Economic Constitutions 2020 Steffen Hindelang, Andreas Moberg, 2021-03-29 This book presents the very first interdisciplinarily grounded comprehensive appraisal of a future Common European Law on Investment Screening Thereby it provides a foundation for a European administrative law framework for investment screening by setting out viable solutions and evaluating their pros and cons Daimler the harbour terminal in Zeebrugge or Saxo Bank are only three recent examples of controversially discussed company takeovers in Europe The elephant in the room is China and its Belt and Road Initiative The political will in Europe is growing to more actively control investments flowing into the EU The current regulatory initiatives raise several fundamental constitutional and regulatory issues Surprisingly they have not been addressed in any depth so far The book takes stock of the current rather fragmented regulatory approaches and combines contributions from leading international academics practitioners and policy makers in their respective fields Due to the volume's comprehensive approach it is expected to influence the broader debate on the EU's upcoming regulation of this matter The book is addressed to participants from academia as well as to representatives from government business and civil society

*NBER Macroeconomics Annual 2015* Martin Eichenbaum, Jonathan A. Parker, 2016-06-22 This year the NBER Macroeconomics Annual celebrates its thirtieth volume The first two papers examine China's macroeconomic development Trends and Cycles in China's Macroeconomy by Chun Chang Kaiji Chen Daniel F Waggoner and Tao Zha outlines the key characteristics of growth and business cycles in China Demystifying the Chinese Housing Boom by Hanming Fang Quanlin Gu Wei Xiong and Li An Zhou constructs a new house price index showing that Chinese house prices have grown by ten percent per year over the

past decade The third paper External and Public Debt Crises by Cristina Arellano Andrew Atkeson and Mark Wright asks why there appear to be large differences across countries and subnational jurisdictions in the effect of rising public debts on economic outcomes The fourth Networks and the Macroeconomy An Empirical Exploration by Daron Acemoglu Ufuk Akcigit and William Kerr explains how the network structure of the US economy propagates the effect of gross output productivity shocks across upstream and downstream sectors The fifth and sixth papers investigate the usefulness of surveys of household s beliefs for understanding economic phenomena Expectations and Investment by Nicola Gennaioli Yueran Ma and Andrei Shleifer demonstrates that a chief financial officer s expectations of a firm s future earnings growth is related to both the planned and actual future investment of that firm Declining Desire to Work and Downward Trends in Unemployment and Participation by Regis Barnichon and Andrew Figura shows that an increasing number of prime age Americans who are not in the labor force report no desire to work and that this decline accelerated during the second half of the 1990s
