The Oxford Handbook Of Topic Theory Oxford Handbooks:

The Oxford Handbook of Topic Theory Danuta Mirka PhD, 2014-10-16 Topics are musical signs developed and employed primarily during the long eighteenth century. Their significance relies on associations that are clearly recognizable to the listener with different genres, styles, and types of music, making Topic theory, which is used to explain conventional subjects of musical composition in this period, grounded in eighteenth-century music theory, aesthetics, and criticism while drawing also from music cognition and semiotics. The concept of topics was introduced into by Leonard Ratner in the 1980s to account for cross references between eighteenth-century styles and genres. As the invention of a twentieth-century academic topic theory as a field is comparatively new, and *The Oxford Handbook of Topic Theory* provides a much needed reconstruction of the field's aesthetic underpinnings. The volume grounds the concept of topics in eighteenth-century music theory, aesthetics, and criticism. Documenting the historical reality of individual topics on the basis of eighteenth-century sources, it traces the origins of topical mixtures to transformations of eighteenth-century musical life and relates topical analysis to other methods of music analysis conducted from the perspectives of composers, performers, and listeners. Focusing its scope on eighteenth-century musical repertoire, *The Oxford Handbook of Topic Theory* lays the foundation for further investigation of topics in music of the nineteenth, twentieth, and twenty-first centuries.

Studies on a Global History of Music Reinhard Strohm, 2018-04-09 The idea of a global history of music may be traced back to the Enlightenment, and today the question of a conceptual framework for a history of music that pays due attention to global relationships in music is often raised. But how might a historical interpretation of those relationships proceed? How should it position or justify itself? What would Western music look like in an account of music history that aspires to be truly global? The studies presented in this volume aim to promote post-European historical thinking. They are based on the idea that a global history of music cannot be one single hegemonic history. They rather explore the paradigms and terminologies that might describe a history of many different voices. The chapters address historical practices and interpretations of music in different parts of the world, from Japan to Argentina and from Mexico to India. Many of these narratives are about relations between these cultures and the Western tradition; several also consider socio-political and historical circumstances that have affected music in the various regions. The book addresses aspects that Western musical historiography has tended to neglect even when looking at its own culture: performance, dance, nostalgia, topicality, enlightenment, the relationships between traditional

classical and pop musics and the regards cross between European Asian or Latin American interpretations of each other's musical traditions These studies have been derived from the Balzan Musicology Project Towards a Global History of Music 2013-2016 which was funded by the International Balzan Foundation through the award of the Balzan Prize in Musicology to the editor and designed by music historians and ethnomusicologists together A global history of music may never be written in its entirety but will rather be realised through interaction practice and discussion in all parts of the world The

Baroque Music in Post-War Cinema Donald Greig, 2021-03-04

Studies of pre existing music in narrative cinema often focus on a single film composer or director The approach here adopts a wider perspective placing a specific musical repertoire baroque music in the context of its reception to explore its mobilisation in post war cinema It shows how various revivals have shaped musical fashion and how cinema has drawn on resultant popularity and in turn contributed to it Close analyses of various films raise issues of baroque musical style and form to question why eighteenth century music remains an exception to dominant film music discourses Account is taken of changing modern performance practice and its manifestation in cinema particularly in the biopic This question of the reimagining of baroque repertoire leads to consideration of pastiches and parodies to which cinema has been particularly drawn and subsequently to the role that neobaroque music has played in more recent films
