The Open Past: Subjectivity and Remembering in the Talmud Sergey Dolgopolski, 2013 The Open Past challenges a view of time that has dominated philosophical thought for the past two centuries In that view time originates from a relationship to the future and the past can be only a fictitious beginning the necessary phantom of a starting point a chronological period of before This view of the past has permeated the study of the Talmud as well resulting in the application of modern philosophical categories such as the thinking subject subjectivity and temporality to the thinking displayed in the texts of the Talmud The book seeks to reclaim the originary power and authority the past exerts in the Talmud Central to the task of reclaiming a radical role for the past are medieval notions of the virtual and their contrasting modern appropriations the thinking subject among them These serve as both a bridging point and a demarcation between the practices of thinking and remembering displayed in the conversations held by the characters in the Talmud by contrast to other rhetorical or philosophical schools and disciplines of thought The elements of plane trigonometry. [Followed by] The elements of spherical trigonometry James Hann, 1854 Safety Related Recall Campaigns for Motor Vehicles and Motor Vehicle Equipment, Including Tires United States. National Highway Traffic Safety Administration, 1977 **Art Of Memory** F A Yates, 2013-10-08 First Published in 1999 This title is the third volume in the ten volume set titled the Selected Works of Frances Yates Greyscale illustrations and figures are included throughout alongside the related descriptive work where applicable The art in this volume seeks to memorise through a technique of impressing places and images on memory It has usually been classed as mnemotechnics which appears an unimportant branch of human activity However the author discusses in this title that the manipulation of images in memory must always to some extent involve the psyche

*Prosthetic Memories* Hyaesin Yoon, 2025-01-03 In *Prosthetic Memories* Hyaesin Yoon examines the entanglements of humans animals and technologies across South Korea and the United States at the turn of the twenty first century Interrogating a variety of body technology interfaces Yoon outlines an emergent mode of prosthetic memory in which human memory is extended into both machines and animals Prosthetic memory overflows and provides an alternative to familiar human perception Western scientific reason and other senses of knowledge in ways that can foster networks of solidarity care and empathy between human and nonhuman subjects Among other sites and subjects Yoon examines tongue surgery to correct English pronunciation in Korea Asian American poetry that engages the human machine divide transnational dog cloning and stem cell research each of which activates potent postcolonial feminist mnemonics and alliances In so doing Yoon narrates the counter-memories of racialized gendered diasporic queer and marginalized human and nonhuman others that work against the violent and isolating biopolitical and neoliberal forces in contemporary society Figures of Memory Zsolt Komaromy, 2011-04-01 Zsolt Komaromy's *Figures of Memory* From the Muses to Eighteenth Century British Aesthetics affects a rapprochement between memory studies and eighteenth century British aesthetics It argues that the assessment of

memory in the history of aesthetics and criticism has been determined by the ideological import of the creative imagination based on the dichotomies of imitative versus creative or reproductive versus productive mental and artistic procedures. The legacy of such an opposition can still be felt in the way the literary relevance of memory is based on either viewing it as a representational reproductive imitative power that is a counter term to the creative sense of the imagination or as a constructive productive creative power that is assimilated by the creative imagination. The notion of memory however harbors problems that unsettle such dichotomies. This book does the timely work of employing insights offered by memory studies in reconsidering memory in the history of aesthetics; it suggests that memory's literary relevance is explained precisely by the problems that make it resistant to the reproductive productive opposition. These problems are explored through various figures representing senses of memory such as the Muses or metaphors for memory in philosophical and critical discourse. Tracing figures of memory from the Muses through Plato and Descartes to works by Pope Addison Gerard and Kames Komromy reveals an undercurrent of thought in eighteenth century British aesthetics that questions memory's nominal opposition to the imagination and that exploits memory's simultaneously reproductive and constructive nature in the emerging theory of the imagination. By thus claiming that the tradition of memory's literary relevance is not marginalized but in fact perpetuated in eighteenth century British critical thought, *Figures of Memory* gives a powerful new perspective on the history of memory in aesthetics and criticism. A theoretical work with claims for historical generalization, *Figures of Memory* will appeal to those interested in the history of aesthetics and criticism in memory studies in literary theory to students of literature and memory of literature and psychology and to scholars of the eighteenth century with theoretical interests.
