into answering them Politics religion philosophy and personal ambition all have played roles in this drama There are poignant personal stories of people like Copernicus Kepler Newton Herschel and Hubble Today scientists are attempting to determine the distance to objects near the borders of the observable universe far beyond anything that can be seen with the naked eye in the night sky and to measure time back to its origin The numbers are too enormous to comprehend Nevertheless generations of curious people have figured them out one resourceful step at a time Progress has owed as much to raw ingenuity as to technology and frontier inventiveness is still not out of date
