The USDA serving guide.

## Food For Thought

What's on the school menu today? French fries, chips, or baked potatoes? Believe it or not, a battle is being fought over what is on your school lunch tray. The U.S. Department of Agriculture is responsible for creating nutritional guidelines for school lunches and wants to limit the amount of white potatoes and other starchy vegetables to one cup a week, or two servings. This proposal affects everyone from the potato farmer to the cafeteria worker to the students eating the tater tots. Not surprisingly, all of these people have differing opinions...

## Eat Your Broccoli

Supporters of limiting potato servings argue that potatoes are often served fried or topped with high calorie items like sour cream, cheese, and bacon. They also worry that when students are given a choice between French fries or something like carrots or green beans, they too often choose the fries. Poor eating choices made early in life lead to obesity and numerous long-term health problems like diabetes and heart disease.

### Did you know?

The school cafeteria is the largest restaurant in the country, serving over 31 million students every single day.

### More Please...

Serving sizes in school lunches are based on grade level and age.

## Would you like fries with that?

Opponents of the proposed change offer that potatoes are full of nutritional value, and aren't always served in unhealthy ways. Fries can be baked rather than fried, and baked potatoes can be topped with healthier alternatives, like salsa. They also argue that potatoes are a cheap and plentiful option for a vegetable serving and that limiting potatoes would increase school lunch costs across the nation.

## Interested?

The people on all sides of this argument have an **interest** in the outcome of the debate. That just means they are interested or concerned with how things end up. People pay attention to things that will likely affect their lives.

How might limiting starchy vegetables like potatoes affect...

Students?

Potato Farmers?

Schools?

**Knowledge in Action** Annemarie van Paassen, Jolanda van den Berg, Eveliëne Steingröver, Renate Werkman, Bas Pedroli, 2011-10-05 Wageningen University and Research Centre is known for its practical and societally relevant research in spatial development. Stakeholders currently put much emphasis on participatory processes in landscape planning procedures. This poses a special challenge for research. What role does research play in our present world characterised by complexity, competing claims and development needs and an increased concern for climate change and environmental impact? In the book *Knowledge in Action* we explore different types of transdisciplinary research that scientists engage in. Depending on the societal context and the interests of local citizens, researchers apply different research approaches to optimally incorporate the various points of view in their research and promote processes enhancing dialogue and shared results. In the book, authors present their research experiences, their theoretical inspiration, the research methodology applied to consult, share and collaborate with societal actors in order to create options for change. The book includes several striking examples from The Netherlands, both successful and less effective, and also innovative examples from communities in Africa and Asia. The authors reflect on opportunities, problems and dilemmas they had to deal with. They especially address how far the role and theoretical perspectives of collaborative researchers can lead them in action research. Can they limit themselves to joint knowledge production and learning processes, or should they engage in strategic positioning, advocacy and entrepreneurship to make it happen? The book discusses the issues that researchers should consider when they position their research activities within ongoing developments at landscape level. Read the book and judge for yourself. [Analyzing American Democracy](#) Jon R. Bond, Kevin B. Smith, 2013-05-29 *Analyzing American Democracy* teaches students to think analytically by presenting current political science theories and research in answering the engaging big questions facing American politics today. It serves as both an introduction to American politics and to the discipline of political science by reflecting the theoretical developments and empirical inquiry conducted by researchers. Every chapter highlights the most current research and discusses related public policy. It demonstrates for students how to think critically and analytically, bringing theoretical insight to contemporary American politics. More than just a comprehensive overview and description of how American politics works, Jon Bond and Kevin Smith demonstrate how politics can be studied systematically. Throughout the text, they introduce students to the insights gleaned from rational choice, behavioral and biological approaches to politics. Understanding these three social scientific models and their applications helps students get the most out of their American government course and out of this text; they learn a way of thinking that they can use to make sense of future challenges facing the American polity. A number of features help aid comprehension and critical thinking. Key Questions at the start of every chapter frame the learning objectives and concepts. Politics in Practice boxes in every chapter encourage students to think critically about how practice compares with theory. Tables, Figures, Charts and Maps throughout present the empirical details of American politics.

helping students gain quantitative literacy Top Ten Takeaway Points at the end of every chapter recap the most important points covered but also help students discern the general principles that make sense of the numerous factual details Key Terms are bolded in the text defined in the margins recapped at the end of the chapter and compiled in a glossary all to help insure that students can effortlessly master the vocabulary of American politics and political science in order to move on to the more important concepts

**Interest Groups and Trade Policy** Gene M. Grossman, Elhanan Helpman, 2020-10-06 Gene Grossman and Elhanan Helpman are widely acclaimed for their pioneering theoretical studies of how special interest groups seek to influence the policymaking process in democratic societies This collection of eight of their previously published articles is a companion to their recent monograph Special Interest Politics It clarifies the origins of some of the key ideas in their monograph and shows how their methods can be used to illuminate policymaking in a critical area Following an original introduction to the contents of the book and its relationship to Special Interest Politics the first three chapters focus on campaign contributions and candidate endorsements two of the tools that interest groups use in their efforts to influence policy outcomes The remaining chapters present applications to trade policy issues Grossman and Helpman demonstrate how the approaches developed in their monograph can shed light on tariff formation in small and large countries on the conduct of multilateral trade negotiations and on the viability of bilateral free trade agreements They also examine the forms that regional and multilateral trade agreements are likely to take and the ways in which firms invest abroad to circumvent trade barriers induced by political pressures The articles collected in this volume are required reading for anyone interested in international relations trade policy or political economy They show why Grossman and Helpman are global leaders in the fields of international economics and political economy

**Lobbying in the European Union** Heike Klüver, 2013-02-28 Thousands of lobbyists lobby decision makers in Brussels every day but little is known about their impact on policy Lobbying in the European Union addresses this research gap and analyzes the conditions under which interest groups can successfully lobby the European institutions

**The Test of Time** Rick Farmer, John David Rausch, John Clifford Green, 2003-01-01 The Test of Time moves beyond the realm of speculation and punditry to analyze the observable and measurable effects of the early experiences of state legislature term limits Setting the agenda for future term limits studies this volume brings together fifteen outstanding empirical studies contributed by top political scientists and state policymakers Five of the essays case studies of key states offer depth and context for understanding the shifting institutional changes wrought by term limits at the state level The remaining chapters develop these findings through cross state comparisons that examine how legislatures legislators and political linkages such as lobbying and electoral competition have been affected by the imposition of legislative term limits Supported by a comprehensive annotated bibliography of term limits literature and a history of the term limits movement this work will be an enduring resource for academics teaching courses in state government and practitioners either experiencing term limits or preparing for term limits to take effect
