**Doing Democracy** Darren E. Lund, Paul R. Carr, 2008 In this provocative collection of essays with a distinctly critical and nuanced approach to how democracy is taught learned understood and lived authors from four continents share their visions on how democracy needs to be cultivated critiqued demonstrated and manifested throughout the educational experience The collective concern is how we actually do democracy in education The essays argue that democracy must be infused in everything that happens at school curriculum extra curricular activities interaction with parents and communities and through formal organization and structures One of the book's central questions is Are educators merely teaching students skills and knowledge to prepare them for the world of work or is education more about encouraging students to thrive within a pluralistic society This book reveals that democracy is an ethos an ideology a set of values a philosophy and a complex and dynamic terrain that is a contested forum for debate From seasoned veterans to emerging scholars these writers challenge the idea that there is only one type of democracy or that democracy is defined by elections Using a range of theoretical conceptual and methodological approaches each essay makes a compelling case for how education can advance a more critical engagement in democracy that promotes social justice and political literacy for all Diverse examples illustrate the theme of doing democracy With its numerous models for teaching and learning to encourage critical thinking and engagement this book is certain to be an invaluable resource to educators researchers students and anyone with a passion for democratic ideals

**Beyond the Bubble Test** Linda Darling-Hammond, Frank Adamson, 2014-06-16 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment Beyond the Bubble Test How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in Beyond the Bubble Test paint a useful picture of how

schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what is possible at the local and state levels Linda Darling Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U S borders to Singapore Hong Kong and other places whose reform mindedness can serve as an example to us School Leaders' Sensemaking and Sensegiving Judith M. Norris, 2022-04-11 In this book Judith Norris presents a theoretical model that demonstrates a new approach to understanding how school leaders respond to conflicting expectations and demands The idea of sensemaking and sensegiving is theoretically interesting and allows the reader to focus on how school leaders make sense but also how they give sense to others in the complex conditions that educators now must negotiate Like the Eucalyptus tree educational leaders must adapt to their contradictory environments Written in the most accessible way the theory and its application will likely appeal not only to researchers but also to teachers and school administrators Norris has created a real applicability to school leadership in various international contexts **Rethinking the History of American Education** W. Reese, J. Rury, 2007-12-25 This collection of original essays examines the history of American education as it has developed as a field since the 1970s and moves into a post revisionist era and looks forward to possible new directions for the future Contributors take a comprehensive approach beginning with colonial education and spanning to modern day while also looking at various aspects of education from higher education to curriculum to the manifestation of social inequality in education The essays speak to historians educational researchers policy makers and others seeking fresh perspectives on questions related to the historical development of schooling in the United States **Educational Research and Innovation Governing Education in a Complex World** OECD, 2016-04-12 What models of governance are effective in complex education systems In all systems an increasing number of stakeholders are involved in designing delivering and monitoring education
