Mazis, 2016-09-21 Assesses Merleau Ponty's contribution to ethics as calling for a poetic interplay between perception and imagination and between silence and solidarity that reveals our place in the world and our obligations to ourselves and others. Before his death in 1961, Merleau Ponty worried about what he saw as humanity's increasingly self enclosed and manipulative way of experiencing self others and the world the consequences of which remain apparent in our destructive inability to connect with others within and across cultures. In Merleau Ponty and the Face of the World Glen A. Mazis provides an overall consideration of Merleau Ponty's philosophy that brings out what he sees as a corrective prescription for ethical reorientation that is fundamental to Merleau Ponty's thought. Mazis begins by analyzing the key role that silence plays for Merleau Ponty as a positive powerful presence rather than a lack or emptiness and then builds on this to explore the ethical significance of the face to face encounter in his thought as one of solidarity rather than obligation. In the last part of the book, Mazis traces the development of what he calls physiognomic imagination in Merleau Ponty's work. This understanding of imagination is not fancy or make believe but rather brings out the depths of perceptual meaning and leads to an appreciation of poetic language as the key to revitalizing both ethics and ontology. Drawing on Merleau Ponty's published works, lecture notes, unpublished writings and the work of many phenomenologists and Merleau Ponty scholars, Mazis also offers incisive readings of Merleau Ponty's work as it relates to that of Antoine de Saint Exupéry, Gaston Bachelard and Emmanuel Levinas. **The Teacher's handbook of psychology** James Sully, 1914

Catastrophes and Conflicts Klaus Gottstein, 2018-12-17 First published in 1999 this book describes what the International community of scientific institutions could do to reverse this trend by pooling its know how and resources in International and interdisciplinary working groups and standing committees by preparing options for action and by standing the possibilities for overcoming the political and economic obstacles to the implementation of expert advice. The reasons are given why neighboring groups of people sooner or later start fighting each other unless certain conditions are fulfilled. These conditions are enumerated. Historical examples are presented. Since lack of mutual trust often based on inherited enemy images is at the roots of many conflicts is shown how trust among former opponents can be created by working on joint projects particularly when both sides are threatened by the same danger. In previous history this

danger was often a common enemy Today we must learn that all of mankind is threatened by environmental and other global problems which can only be mastered by joint efforts forgetting the enmities of earlier generations Furthermore it is explained that many catastrophes could be avoided if risks were properly assessed and taken seriously and necessary precautions not avoided for financial reasons just hoping for the best

Constructive Interventions Lars Kirchhoff, 2008-01-01 In the contemporary discipline of conflict resolution adjudication and alternative dispute resolution ADR are often seen as antagonistic trends This important book contends that on the contrary it is the bringing together of these trends that holds the most promise for an effective system of international justice With great insight and passion built firmly on a vast

knowledge of the field Lars Kirchhoff exposes the contemporary structural barriers to effective conflict resolution defining where adjudication ends and ADR and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play The work starts by defining the challenges potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way In the course of its investigation the book accomplishes the following illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically conveys the nature and consequences of intervention through mediation focusing on the method s critical challenges and clarifies the particular model of international mediation under development through UN initiatives In approaching these intertwined topics the author draws concrete conclusions for the realms of international law and related disciplines as well as for the organizational context of the United Nations He explores such diverse scenarios as conflicts between States conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication It is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice Although some of the reasons for this phenomenon are beyond the influence of scholarly debate in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature It is the great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be of immeasurable value and benefit to all scholars policymakers and activists dedicated to the pursuit of peace

Perception-Cognition Interface & Cross-Modal Experiences: Insights into Unified Consciousness Aleksandra Mroczo-Wąsowicz, 2017-01-26 The present Research Topic explores closely related aspects of mental functioning namely an interplay between perception and cognition interactions among various sensory modalities and finally more or less unified conscious experiences arising in the context of these relations Contributions emphasize a high flexibility observed in perception and may be seen as potential challenges to the traditional modular architecture of perceptual systems Although the articles describe different phenomena they follow one common theme to investigate broadly understood unified experience by studying either perception cognition integration or the integration between sensory modalities These integrative processes may well apply to subpersonal unconscious representations However the aim here is to approach phenomenal experience and thus a straightforward way of thinking about it is in terms of conscious perception Putting together scientific and philosophical concerns this special issue encourages extending the study of perceptual

experience beyond the single sense perception to advance our understanding of the complex interdependencies between different sensory modalities other mental domains and various kinds of unifying relations within conscious experience It exhibits a remarkable need to study these phenomena in tangent and so the authors examine a variety of ways in which our perceptual experiences may be cross modal or multisensory integrated embodied synesthetic cognitively penetrated or otherwise affected by top down influences The Research Topic comprises theoretical and empirical contributions of such fields as philosophy of mind cognitive science psychology and neuroscience in the form of hypothesis and theory articles original research articles opinion papers reviews and commentaries Study Guide for Psychology in Everyday LIfe David G. Myers, Richard O. Straub, 2008-11-28
