The Kalām Cosmological Argument: A Reassessment Jacobus Erasmus,2018-01-08 This book offers a discussion of the kalām cosmological argument and presents a defence of a version of that argument after critically evaluating three of the most important versions of the argument It argues that since the versions of the kalām cosmological argument defended by Philoponus c 490 c 570 al Ghazālī 1058 1111 and the contemporary philosopher William Lane Craig all deny the possibility of the existence of an actual infinite these arguments are incompatible with Platonism and the view that God foreknows an endless future This conclusion however is not a problem for the proponents of the kalām cosmological argument for the book shows how the argument can be defended without denying the possibility of the actual infinite In order to offer a comprehensive analysis of Philoponus and al Ghazālī's cosmological arguments the book draws on recent English translations of some of their works Next the book advances a detailed argument against the popular argument based on the impossibility of an actual infinite Finally the book offers a unique defence of the kalām cosmological argument by defending philosophical arguments for a beginning of time that do not deny the actual infinite evaluating which hypothesis best explains the discoveries of modern cosmology and offering an argument in support of the premise that if the universe came into existence then God brought it into existence

The Multiverse and Participatory Metaphysics Jamie Boulding, 2021-09-30 This book offers a new theological approach to the multiverse hypothesis With a distinctive methodology it shows that participatory metaphysics from ancient and medieval sources represents a fertile theological ground on which to grapple with contemporary ideas of the multiverse There are three key thinkers and themes discussed in the book Plato and cosmic multiplicity Aquinas and cosmic diversity and Nicholas of Cusa and cosmic infinity Their insights are brought into interaction with a diverse range of contemporary theological philosophical and scientific figures to demonstrate that a participatory account of the relationship between God and creation leads to a greater continuity between theology and the multiverse proposal in modern cosmology This is in contrast to existing work on the subject which often assumes that the two are in conflict By offering a fresh way to engage theologically with multiverse
