 Database information screen **The Indigenous Fermented Foods of the Sudan** Hamid A. Dirar, 1993 Recent decades
 have witnessed increased interest in the foods of Africa spurred on by the recurrent famines that have plagued the continent
 It is now recognized that helping people to use their own knowledge of indigenous foods and agriculture provides better
 prospects for long term sustainability than imposing solutions from outside Yet to date there has been little documented
 information about the foods that are utilized by the poor of Africa and particularly how these foods are preserved in a hostile
 environment for later use This book is a unique compilation of both the general literature on Africa s fermented foods and
 beverages and of original research conducted by the author in Sudan Information was gathered from elderly rural women
 who traditionally hand down such knowledge from generation to generation With increased urbanization and dislocation of
 family structures there is a danger that such knowledge might otherwise be lost forever The various foods are considered in
 terms of their role in the struggle for survival and in the social fabric of rural Sudan as well as from the perspectives of
 nutrition and food microbiology The book is a major contribution to this literature of interest to all concerned with food
 science human nutrition and rural development Subject Guide to Books in Print, 1983 *Agri-food Quality* G. R.

 harnessing of micro organisms and plant microbial cells for the production of specific materials of direct use to man or for
 the improvement of the environment Discussing both traditional and emerging aspects of the science this unique book
 reviews numerous exciting applications of biotechnology in developing countries emphasizing that a small improvement in

energy efficiency utilization or generation may have far reaching effects in improving the quality of life of people in poor communities
