Pedagogy in a New Tonality Peter Gouzouasis, 2012-01-01 This is a book for teachers by teachers from elementary school to university level classrooms It is about the use of creative instructional strategies in K 12 classroom settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum Over twenty teachers conducted research in their classrooms on the implementation of creative strategies tactics graphics organizers and visual journals in teaching and learning They have written their inquiries in a narrative style informed by various forms of arts based educational research Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook *Beyond Monet The Artful Science of Instructional Intelligence* However through their journeys of becoming teacher learner researchers many discovered numerous creative variations of Bennett s work as it was implemented in their classrooms While there are many professional books that provide ideas on collaborative learning and creative teaching approaches there is very little published research on the efficacy of these concepts in the K 12 classroom These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students learning Thus this book has

widespread interest for teachers and administrators who seek to implement systemic changes in the ways that teachers teach and children learn in the 21st century *The Reading-writing Workshop* Norma R. Jackson, 1992 Grade level 1 2 3 4 5 e p i t
