ENGINE NUMBER LOCATION

ENGINE NUMBER

The engine number is located on the right side of the engine block. It is a 10-digit number that identifies the engine and its specifications. The first four digits represent the engine model, and the last six digits represent the production date and sequence number.

When checking the engine number, make sure you are looking at the correct location. The number is stamped into the metal and is not painted on. If you are having trouble finding the number, consult the service manual for more information.

The engine number is also used to identify the engine for warranty purposes. If you have any problems with the engine, you will need to provide the engine number to the dealer or manufacturer.

It is important to keep the engine number in a safe place. You may need it at any time, so make sure you have it handy. The engine number is also used to identify the engine for parts and service.
